## H. PUBLIC PARTICIPATION

The Woonsocket Industrial Pretreatment Program is as a matter of policy always open and available to meet with any industrial user or member of the public to discuss any concern regarding pretreatment that they might have.

It is also the policy of the Division to refer industrial users who would benefit from technical assistance to RIDEM's Office of Environmental Coordination.

Recently the City of Woonsocket Wastewater Division launched its own web page, which has a section for Pretreatment. In this section it explains the purpose of pretreatment. The public can also download the SUO and permit applications as well as review the Pretreatment rates.

Annual reports for 2010, 2011 and 2012 are available to the public review or download

In addition, the webpage has a links to the U.S.EPA website as well as RIDEM website.

## I. PROGRAM EVALUATION

The Woonsocket Regional Wastewater Commission's Industrial Pretreatment Program (IPP) continues to perform its function in an effective and efficient fashion.

The IPP received adequate funding for this reporting period. No activity was curtailed due to inadequate funding.

Violations of program requirements were detected and previously described enforcement actions were taken as per the Enforcement Response Guide.

There were nine notices of violation enforcement actions this reporting period and \$158,959.28 in fines was issued.

IPP has issued permits to all restaurants in Woonsocket, North Smithfield, Blackstone and Bellingham. This is part of the City's effort to reduce the impact of FOG on the sewer collection system as part of the City's plan to reduce SSO.

## J. PROGRAM MODIFICATION EVALUATION

The City has evaluating the local limits according to EPA procedure and a report was submitted to RIDEM. The City is in the process to address all RIDEM comments shortly.

Upon the approval of local limits by RIDEM all SIU permits will be modified to reflect the new limits.

## K. INTERFERENCE AND PASS THROUGH

The IPP continues to work with our contractor, Veolia Water NA, on the ongoing I & I study and reduction of FOG.

The City is operating under the terms of an administrative order imposed by the US EPA. As part of that order the IPP has completed permitting food service establishments within our area of jurisdiction. As part of that effort, the IPP has issued 157 permits to restaurants located within our service area of jurisdiction.

## L. POLLUTANT ANALYSIS SUMMARY

Composite samples are collected of the raw Influent and final effluent are collected three time a week as per permit requirement and monthly average data for heavy metals summarized in the following tables. The graphs included compare plant effluent to plant permit limits
