B.   CHANGE NOTIFICATIONS

There was no change in the volume of pollutant loading to the POTW as compared to the last reporting period.

Based on RIDEM approval of the new local limits, IPP reissued new permit to all IU and Restaurants to reflect the new local limits.

Pretreatment Annual Report 2015

C.   COMPLIANCE STATUS OF EACH SIGNIFICANT INDUSTRIAL USER

All Significant Industrial Users (SIU's) were evaluated for Significant Non-Compliance (SNC) using the Arolling six month period as follow:

- April 1 to September 30.

- July 1 to December 31.

- October 1 to March 31.

- January 1 to June 30.

The following are the evaluations for each SIU.

Also included in this section are details of all violations issued during this reporting year.

The IPP issued surcharges to every SIU who exceeded permit limits of BOD/COD and TSS

No violations have been issued to Technic, Inc. as they are still under a consent agreement with the City until 12/31/15.

All SIU's that show a violation are still within their mass limits.

The following are the Notice of Deficiency (NOD) issued by the division and the response if the IU

C.   COMPLIANCE STATUS OF EACH SIGNIFICANT INDUSTRIAL USER

All Significant Industrial Users (SIU's) were evaluated for Significant Non-Compliance (SNC) using the Ārolling six month period as follow:

- April 1 to September 30.

- July 1 to December 31.

- October 1 to March 31.

- January 1 to June 30.

The following are the evaluations for each SIU.

Also included in this section are details of all violations issued during this reporting year.

The IPP issued surcharges to every SIU who exceeded permit limits of BOD/COD and TSS

No violations have been issued to Technic, Inc. as they are still under a consent agreement with the City until 12/31/15.

All SIU's that show a violation are still within their mass limits.

The following are the Notice of Deficiency (NOD) issued by the division and the response if the IU

RE: Notice of Deficiency   Wright's Dairy Farm   Permit #3016

Dear Ms. Dulude,

The Pretreatment Division received your company's self-monitoring report for August on 09/15/14. Upon reviewing and entering the data into our pretreatment program it was noted that the results for Oil & Grease exceeded the permitted limit of 100mg/l. Your laboratory reported a result of 122.5mg/l.

This is the second deficiency notice to be sent out to your company in the past six months. The Oil & Grease limit was also exceeded during the sampling done on 03/27/14 when an inspection with sampling was conducted by the Pretreatment Division.

Please respond within 15 days of receipt of this notice outlining what steps your company will be taking to avoid exceeding your oil & grease limits in the future.

Sincerely,
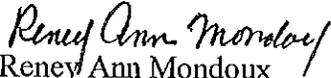

Reney Ann Mondoux

Re: Notice of Deficiency

Dear Dolores:

Regarding the notice of deficiency dated September 30, 2014 for the Oil & Grease results. In order to avoid Oil & Grease exceeding the permitted limit, all milking equipment will be checked by our technician to ensure proper performance. Also, we will adjust our milking shut down procedure to ensure all milk has been evacuated from the system into the bulk tank prior to starting the wash-up procudure.

If you have any questions please feel free to contact me.

Very truly yours,

Elizabeth W. Dulude

Dear Mr. Tetrault,

After receiving your self-monitoring report for September the results were averaged with the results from the sampling done by this department during the inspection conducted at your facility on 09/09/14 and it was found that the pounds per day mass limit on Phosphorus (T) was exceeded. The ppd mass limit is 24, the result was 30.82.

Please respond within 30 days of receipt of this notice outlining what steps your company will be taking to avoid exceeding your Phosphorus (T) mass limit in the future.

Permit #1019

To:
Reney Ann Mondoux
Deputy Supt. For Enforcement
Woonsocket Regional Wastewater Commission
11 Cumberland Hill Road (Rear)
Woonsocket, RI 02895-4819

Dear Ms. Mondoux,

This letter is in response to the Notice of Deficiency letter received by DCHN, LLC on October 18, 2014, which indicated that our pounds per day mass limit for Phosphorus was out of compliance. We are currently generating a detailed plan with which to address the situation. The general steps we are taking are as follows:

- **Confirmation of DCHN's testing results:** The test facility that we currently work with has consistently generated results indicating we are well within the pounds per day mass limit for Phosphorus. We want to evaluate our sampling method to determine whether it may be the source of the disparity in the results between Woonsocket and DCHN.
- **Review of internal methods:** We will review our current method for handling the Phosphorus containing effluent to determine if we can manage it using an internally engineered solution.
- **Review of outside services:** We will assess the practicality of working with an outside service to remove the Phosphorous containing effluent.
- **Identify & execute plan:** After we have confirmed results and assessed our options we will choose the most expeditious plan and execute.
- **Consistent Communication:** We will provide Woonsocket with regular communications regarding our progress.
- **Timing:** We would request a 90 day window (beginning November 1, 2014) to conduct the aforementioned activities and execute the plan. We will communicate immediately regarding the need for any schedule extensions.

Please let us know if this is satisfactory. We look forward to working with you to resolve the issue.

Kind Regards,
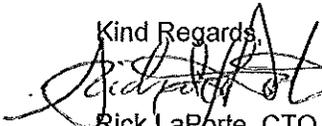

10/27/14

Woonsocket, RI 02895

Dear Mr. Weisberg,

This letter is in response to your request for communication from the City following the NOD for the high silver results from the sampling done during the inspection on 10/21/14.

You asked for written confirmation that the actions taken by Technic were sufficient to satisfy the requirements of the NOD.

Per the NOD, Technic was asked to respond within 15days outlining what steps would be taken to prevent further discharges of silver that exceeded the permit limits. To date nothing has been submitted to this office with this information.

Further testing for silver was done as is required by your facility's permit and is a usual request by this office when any parameter has been exceeded. It should be noted that the sample taken by Technic on 10/28/14 also exceeded permit limits.

This office is again requesting a plan be submitted to this office outlining the steps to be taken to prevent further violations of the permit limits.

If you have any questions pertaining to this matter, please contact this office at 401-766-0555.

Sincerely,
Reney Ann Mondoux

SUBJECT: Technic, Inc. – Engineered Powders Division, Woonsocket, RI
                Notice of Deficiency, February 18, 2015

Ms. Mondoux:

This letter is in response to the Notice of Deficiency dated February 18, 2015 and received on February 24, 2015.

On January 8, Technic discharged wastewater with a silver concentration of 1.48 mg/L. This exceeded our Permit limit of 0.186 mg/L. It was discovered the following day (January 9) that the CIP tank level sensor was malfunctioning. This caused wastewater from the CIP cleaning process to discharge directly to the POTW without any treatment.

To rectify this situation, the sensor was replaced in January, and a second sensor level was purchased to keep in stock as a spare. In addition, Technic subcontractors modified piping onsite to direct CIP discharge back into the holding tanks so that it undergoes wastewater treatment, in the form of microfiltration.

Please contact me if you have any questions.

Sincerely,

Gary P. Hemphill

Woonsocket, RI 02895
Permit #1019

To:
Reney Ann Mondoux
Deputy Supt. For Enforcement
Woonsocket Regional Wastewater Commission
11 Cumberland Hill Road (Rear)
Woonsocket, RI 02895-4819

Dear Ms. Mondoux,

     This letter is in response to the Notice of Deficiency letter written on May 5 and received by DCHN on May 11, 2015. That letter indicated that our pounds per day mass limit for Phosphorus was out of compliance. At the time of our last testing we were also found to be out of compliance (albeit to a much higher extent). In response to those findings we executed a detailed initiative targeted at reducing Phosphorus content which included confirmation of DCHN's testing results, review of internal test methods and review and improvement of our internal practices. According to the results obtained, these efforts appear to have yielded an incremental improvement (i.e. incremental reduction) in the total Phosphorus count.

     In light of these most recent results we are considering working with certain outside services that could help us manage our effluent in addition to an internal remediation system.

     We also feel it would be productive if we were able to visit with you in person. Unfortunately, Jack Tetrault is travelling abroad and will be out of the office until May 29. Would it be possible to look to early June for a possible meeting?

     Please let us know if this response is satisfactory and whether a face to face meeting would be beneficial. We look forward to working with you toward a resolution.

King Regards,
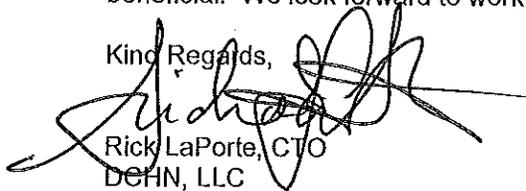

Rick LaPorte, CTO

RE: Letter of Deficiency   National Marker Company   Permit #2043

Dear Mr. Black,

Upon reviewing your company's self-monitoring report for June 2015, which was received on July 7, 2015, it was noted that NMC exceeded the monthly mass limit for COD. The limit for COD is 6 lbs and your result was 6.25 lbs.

Please respond within 15 days of receipt of this notice outlining what steps your company will be taking to avoid exceeding your permitted limits in the future.

Sincerely,
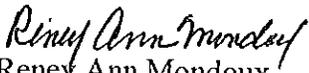

Reney Ann Mondoux

Received 8/5/15

RAM

Dear Reney

On July 20, 2015 I received a notice that we exceeded the June monthly mass limits for COD by .25 PPD.

The process for cleaning the ink, emulsion and block out from the screen is as follows.

1. Once the screening process is complete the operator will wipe off as much ink from the screen as possible with a towel and alcohol which is disposed as solid waste.
2. The screen is sent to screen wash department and at the point the wash operator will give a second wash with a towel and GR31 & ER35 soap to remove the ink, block out & emulsion. The towel will be disposed as solid waste.
3. The third and final process is to place the screen in the wash booth to be power washed. This process has two stages of cleaning.
   a. Wipe the screen with GR31 soap to remove the ink and block out and power wash.
   b. Wipe down the screen with ER35 emulsion remover and power wash.

The following corrective action steps will be put in place to eliminate exceeding the mass limit for COD.

Corrective actions:

3.1 In steps 3a and 3b. We will reduce the amount of the cleaning chemicals GR31 and ER 35 and increase the amount of pressure washing to clean the screens.

Note: We are not diluting the chemicals by adding water but using fewer chemicals so we have to use more water to remove the ink, block out and emulsion.

Sincerely,
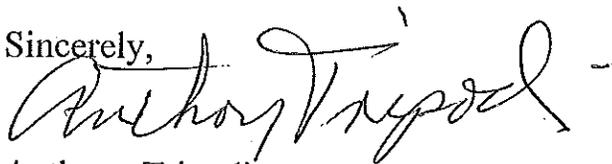

Anthony Tripodi
Env/Health & Safety Officer.

D. SIGNIFICANT NON-COMPLIANCE PUBLICATION

This section contains the copy of this publication in the Woonsocket Call on August 30, 2015 of those industries that were determined, in accordance with Part C.7(1) of Woonsocket's permit, to be in significant non-compliance, received a Notice of Violation/Administrative Order, or other violation as described in the notice. This also meets the requirements of 40 CFR 403.8(f)(2)(vii).

This section also includes a copy of the required affidavit of publication.
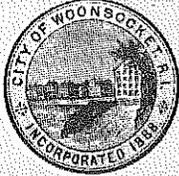

CITY OF WOONSOCKET
PRETREATMENT DIVISION
PUBLIC NOTICE
LIST OF VIOLATORS
From July 1, 2014 – June 30, 2015

The United Environmental Protection Agency regulation 40 CFR 403.8(f)(2)(viii), the City of Woonsocket Sewer Use Ordinance and the Woonsocket Pretreatment Division policy require the Division to publish annually the names of all industrial users which, at any time during the previous twelve months, were in Significant Non-Compliance (SNC) with pretreatment standards and other pretreatment requirements during the preceding twelve months. Industrial users deemed to be in Significant Non-Compliance SNC) are users that have;

A. Chronic violations of wastewater discharge limits, defined here as those in which 66% or more of all the measurements taken for the same pollutant parameter during a six month period exceed (by any magnitude) a numeric pretreatment standard or requirement, including instantaneous limits, as defined by 40 CFR 403.3(l);

B. Technical Review Criteria (TRC) violations, defined here as those in which 33% or more of all of the measurements taken for the same pollutant parameter during a six month period equal or exceed the product of the numeric pretreatment standard or requirement including instantaneous limits, as defined by 40 CFR 403.3(l) multiplied by the applicable TRC (TRC=1.4 for fats, oil and grease, and 1.2 for all other pollutants except pH);

C. Any other violation of a pretreatment standard or requirement as defined by 40 CFR 403.3(l) (daily maximum, long-term average, instantaneous limit, or narrative standard) that the POTW determines has caused, alone or in combination with other discharges, interference or pass through (including endangering the health of POTW personnel or the general public.

D. Any discharge of a pollutant that has caused imminent endangerment to human health, welfare or to the environment or has resulted in the POTW's exercise of it emergency authority under paragraph (f)(1)(vi)(B) of this section to halt or prevent such a discharge;

E. Failure to meet, within 90 days after the schedule date, a compliance schedule milestone contained in a local control mechanism or enforcement order for starting construction, completing construction, or attaining final compliance;

F. Failure to provide, within 30 days after the due date, required reports such as baseline monitoring reports, 90-day compliance reports, periodic self-monitoring reports, and reports on compliance with compliance schedules;

G. Failure to accurately report non-compliance;

H. Any other violation or group of violations, which may include a violation of Best Management Practices, which the POTW determines will adversely affect the operation or implementation of the local Pretreatment program.

Any Industrial User that has received a Notice of Violation/Administrative Order shall also have their name published.

The parameters for which a company was not in compliance and or the specific administrative deficiency are listed after the company name. The numbers in parentheses correspond to the type of violation listed above.

Many of the companies listed have made significant progress toward meeting the standards and may now be in compliance.

Upon review of the industries' self-monitoring reports and the IPP sampling and inspection reports, it was found that no significant industrial users met the above noted criteria that would have required any enforcement action be taken by the Woonsocket Pretreatment Division.

H.   PUBLIC PARTICIPATION

The Woonsocket Industrial Pretreatment Program is as a matter of policy always open and available to meet with any industrial user or member of the public to discuss any concern regarding pretreatment that they might have.

It is also the policy of the Division to refer industrial users who would benefit from technical assistance to RIDEM's Office of Environmental Coordination.

Recently the City of Woonsocket Wastewater Division launched its own web page, which has a section for Pretreatment. In this section it explains the purpose of pretreatment. The public can also download the SUO and permit applications as well as review the Pretreatment rates.

Annual reports for 2010, 2011,2012,2013 and 2014 are available to the public review or download

 In addition, the webpage has a links to the U.S.EPA website as well as RIDEM website.

Pretreatment Annual Report 2015

I.	PROGRAM EVALUATION

The Woonsocket Regional Wastewater Commission's Industrial Pretreatment Program (IPP) continues to perform its function is an effective and efficient fashion.

 inadequate funding.

Violations of program requirements were detected and previously described enforcement actions were taken as per the Enforcement Response Guide.

 IPP has issued permits to all restaurants in Woonsocket, North Smithfield, Blackstone and Bellingham. This is part of the City's effort to reduce the impact of FOG on the sewer collection system as part of the City's plan to reduce SSO.

The City did hire Weston & Sampson to scientifically based local limits for different pollutants.

RIDEM has approved the study and the City Council also approved the new limits in December 2013.

The IPP modified all IU permits to reflect the new limits was completed by February 2014

The following is the Woonsocket Regional Wastewater Commission as established in December 2013

Woonsocket Regional Wastewater Commission Local limits as established in December 2013

PARAMETER	DAILY MAXMUM
Arsenic (total)	0.381 mg/l
Cadmium (total)	0.055 mg/l
Chromium (total)	2.77 mg/l
Copper (total)	3.38 mg/l
Cyanide (total)	1.20 mg/l
Lead (total)	0.69 mg/l
Mercury (total)	0.002 mg/l
Nickel (total)	3.98 mg/l
Silver (total)	0.186 mg/l
Zinc (total)	2.61 mg/l
Total Toxic Organics	2.13 mg/l
BOD	500 mg/l
COD	930 mg/l
TSS	300 mg/l
Total Nitrogen	50 mg/l
Ammonia-N	30 mg/l
Total Phosphorous	25 mg/l
Oil & Grease	100 mg/l
pH	minimum 5.0 units maximum 11.0 units

J.   PROGRAM MODIFICATION EVALUATION

The City has evaluating the local limits according to EPA procedure and a report was submitted to RIDEM. The City is in the process to address all RIDEM comments shortly.

Upon the approval of local limits by RIDEM all SIU permits will be modified to reflect the new limits.

The following are the Notice of Deficiency (NOD) issued by the division and the response if the IU

Pretreatment Annual Report 2015

K. INTERFERENCE AND PASS THROUGH

The City have reviewed CH2M HILL monthly reports submitted to EPA as well as RIDEM for the period July 1, 2014 to June 30, 2015, which indicate that there were no interference or pass through from discharge from any IU discharging to our service area.

The City is operating under the terms of an administrative order imposed by the US EPA. As part of that order the IPP has completed permitting food service establishments within our area of jurisdiction. As part of that effort, the IPP has issued 158 permits to restaurants located within our service area of jurisdiction.

The IPP continues to work with our contractor, Veolia Water NA, on the ongoing I & I study and reduction of FOG.

During the period July 1, 2014 to June 30, 2015 there was no discharge from any restaurants which caused any interference or pass through of sewer to any storm drain in the service area.

L.   POLLUTANT ANALYSIS SUMMARY

Composite samples are collected of the raw influent and final effluent, as listed below, as per permit requirements and monthly average data for heavy metals is summarized in the following tables. The graphs included compare plant effluent to plant permit limits

BOD, TSS	Three times per week
Metals	Two times per week
Oil & Grease	Once a month
Phosphorous	Three times per week
Ammonia	Three times per week June – October
	Monthly November – May
Nitrogen (T)	Three times per week April – October
	Monthly November - March
