EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

EXECUTIVE SUMMARY

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERCLIS-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 3 CERCLIS-NFRAP sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CHUCKLEBERRY'S	675 MANVILLE ROAD	S 1/4 - 1/2 (0.498 mi.)	55	230

WOONSOCKET MILL FIRE	71 VILLANOVA STREETA	WNW 1/4 - 1/2 (0.367 mi.)	J44	148

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

RI SHWS: This list includes sites that have been investigated under the Federal CERCLIS program (SFA sites) as well as sites that have notified under the state program or have been investigated for hazardous substances (HWM sites).

A review of the RI SHWS list, as provided by EDR, and dated 07/16/2015 has revealed that there are 29 RI SHWS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

BLACKSTONE VALLEY GA	FRONT AND COURT STS	W 1/2 - 1 (0.710 mi.)	64	241

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System

AIR EMISSIONS CLASSIFICATION UNKNOWN

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include;

Recipient name: Woonsocket, City of
 Grant type: Assessment
 Property name: LOT 27-91 FORMER ACS INDUSTRIES/LAFAYETTE WORSTED
 Property #: 27-91
 Parcel size: .27

Actual:
116 ft.

Property Description: This property is part of a larger mill complex initially developed around the turn of the twentieth century. The mill complex was first occupied by the Lafayette Worsted Company, which was a textile processing operation. By 1963, the mill complex was operated by the Argonne Worsted Co. and by the Old Co. in 1965. ACS Industries acquired the mill complex by 1967. Since that time, the mill complex has been used to manufacture and store scouring pads and other types of cleaning products. Industrial activities at the mill complex generally ceased in the early 2000's.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US BROWNFIELDS:

Recipient name: Rhode Island DEM
 Grant type: Section 128(a) State/Tribal
 Property name: LOT 27-24 FORMER ACS INDUSTRIES/LAFAYETTE WORSTED
 Property #: 27-24
 Parcel size: 1.59
 Property Description: This property is part of a larger mill complex initially developed around the turn of the twentieth century. This mill complex was first occupied by the Lafayette Worsted Company, which was a textile processing operation. By 1963, the mill complex was operated by the Argonne Worsted Co. and by the Old Co. in 1965. ACS Industries acquired the mill complex in 1967. Since that time, the mill complex has been used to manufacture and store scouring pads and other types of cleaning products. Industrial activities at the mill complex generally ceased in the early 2000's.

Parcel size: 1.59
Property Description: This property is part of a larger mill complex initially developed around the turn of the twentieth century. This mill complex was first occupied by the Lafayette Worsted Company, which was a textile processing operation. By 1963, the mill complex was operated by the Argonne Worsted Co. and by the Old Co. in 1965. ACS Industries acquired the mill complex in 1967. Since that time, the mill complex has been used to manufacture and store scouring pads and other types of cleaning products. Industrial activities at the mill complex generally ceased in the early 2000's.

LOT 27-172 FORMERPRIMARY PROPERTIES/FDS INDUSTRIES (Continued)

1012104897

By 1922 the original building, as well as several other small structures, were demolished and a large brick mill building and three small office buildings were constructed or under construction. By 1950, this property was operated by the Argonne Worsted Company for combing and carding operations. By 1965, the property was operated by the Ariller Electric Co., and then the Miller Electric Co. by 1967. The property was most recently owned by Primary Properties, Inc. Recent occupants included the Procaccianti Group, which used the facility for storage of hotel furniture and Cool Air Creations, a screen-printing company. The property was vacated in the fall of 2008.

Property name: LOT 27-26 ACS INDUSTRIES/FORMER LAFAYETTE WORSTED
 Property #: 27-26
 Parcel size: 2.15

Property Description: This property is part of a larger mill complex initially developed around the turn of the twentieth century. This mill complex was first occupied by the Lafayette Worsted Company, which was a textile processing operation. By 1963, the mill complex was operated by the Argonne Worsted Co. and by the Old Co. in 1965. ACS Industries acquired the mill complex in 1967. Since that time, the mill complex has been used to manufacture and store scouring pads and other types of cleaning products. Industrial activities generally ceased at the mill complex in the early 2000's.

US BROWNFIELDS:
 Recipient name: Woonsocket, City of
 Grant type: Cleanup
 Property name: LOT 165 - FORMER FDS INDUSTRIES
 Property #: Not reported
 Parcel size: 3.27
 Property Description: The original mill building was constructed in approximately 1908. The first documented occupant was the Lafayette Worsted Company in 1911. At that time, the property was abutted to the east and west by the New York, New Haven, and Hartford Rail Road. In 1950, the mill building was part of a larger textile mill complex operated by Argonne Worsted Company. Ariller Electric Company occupied the mill building from 1965 to 1967. In 1967, Miller Electric occupied the mill. The most recent occupants of the mill were the Forte Kashmir Company and the most recent owner, FDS Industries. The City of Woonsocket acquired the property from FDS Industries in 2004 through tax title. A large fire destroyed the main mill building in 2006.

Recipient name: Woonsocket, City of
 Grant type: Cleanup
 Property name: LOT 165 - FORMER FDS INDUSTRIES
 Property #: Not reported
 Parcel size: 3.27
 Property Description: The original mill building was constructed in approximately 1908. The first documented occupant was the Lafayette Worsted Company in 1911. At that time, the property was abutted to the east and west by the New York, New Haven, and Hartford Rail Road. In 1950, the mill building was part of a larger textile mill complex operated by Argonne Worsted Company. Ariller Electric Company occupied the mill building from 1965 to 1967. In 1967, Miller Electric occupied the mill. The most recent occupants of the mill were the Forte Kashmir Company and the most recent owner, FDS Industries. The City of Woonsocket acquired the property from FDS Industries in 2004 through

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Recipient name: Woonsocket, City of
Grant type: Cleanup
Property name: LOT 27-77 FORMER ACS INDUSTRIES
Property #: 27-77
Parcel size: 2.94
Property Description: A two-story brick industrial building was constructed on the property around the turn of the twentieth century. Historical records indicate that the first occupant of the property was the River Spinning Co. By 1922, Guerin Mills Inc. occupied the property. Early land use practices at the property consisted of textile processing including dyeing, scouring, and carbonizing wool and other materials. By the 1950s, the property was occupied by the Lafayette Worsted Co. Throughout the 1960s, ACS Industries occupied the property. In 1969, ACS Industries acquired the property by land merger. Since that time, land use practices at the property generally consisted of manufacturing and storing I mesh and wire products. Following the fire, hazardous waste handling contractors were brought to the property to remove all hazardous materials that remained at the property. The property was then vacant with no buildings until redevelopment activities commenced in 2008.

Property name: LOT 27-81 FORMER CONSOLIDATED AUTO SCREEN
 Property #: 27-81
 Parcel size: 2.91

Property Description: Construction of the original mill building at Lot 81 began around the turn of the twentieth century and was completed by 1910. The first documented occupant of the site was the Loridan Worsted Company in 1903. At that time, properties abutting Lot 81 were occupied by the River Spinning Company to the south and the G. Daignault Planing Mill and Lumber Yard to the north. By 1911, Lot 81 was occupied by the Lowland Worsted Company. At this time, a railroad spur used by the New York, New Haven, and Hartford Railroad was present at the northwestern portion of Lot 81. By 1950, The Bell Company Worsted Mill occupied Lot 81. The Consolidated Print Works, Inc. Textile Prints occupied Lot 81 by approximately 1963. The City of Woonsocket acquired Lot 81 from Consolidated Print Works in 2004.

Recipient name: Rhode Island D.E.M.
Grant type: Section 128(a) State/Tribal
Property name: LOT 27-81 FORMER CONSOLIDATED AUTO SCREEN
Property #: 27-81
Parcel size: 2.91
Property Description: Construction of the original mill building at Lot 81 began around the turn of the twentieth century and was completed by 1910. The first documented occupant of the site was the Loridan Worsted Company in 1903. At that time, properties abutting Lot 81 were occupied by the River Spinning Company to the south and the G. Daignaut Planing Mill and Lumber Yard to the north. By 1911, Lot 81 was occupied by the Lowland Worsted Company. At this time, a railroad spur used by the New York, New Haven, and Hartford Railroad was present at the northwestern portion of Lot 81. By 1950, The Bell Company Worsted Mill occupied Lot 81. The Consolidated Print Works, Inc. Textile Prints occupied Lot 81 by approximately 1963. The City of Woonsocket acquired Lot 81 from Consolidated Print Works in 2004.

Higher Recipient name: Woonsocket, City of
 Grant type: Assessment
Actual: Property name: LOT 27-170 FORMER MUNICIPAL PUMP STATION
148 ft. Property #: 27-170
 Parcel size: .11
 Property Description: Lot 170 has been used as a site for a municipal well pump station for approximately fifty years. The well and associated pumping station currently present at Lot 170 was reportedly installed between 1954 and 1957 to provide an emergency municipal water supply after the Citys reservoir and potable water service was disrupted by Hurricane Carol in 1954. Reportedly, for an unidentified period of time following 1954, groundwater was pumped from this well and treated in order to supply City residents with water. In 1959, the City of Woonsocket acquired Lot 170 from the New England Craftsmen, Inc. The well pump station at Lot 170 has not been active for many years; however no reference to any formal abandonment or decommissioning of this station was documented in historical records.

Property name: LOT 27-78 FORMER CONSOLIDATED AUTO SCREEN
 Property #: 27-78

Parcel size: .5

Property Description: Since the early twentieth century, the New York, New Haven, and Hartford Railroad Company operated a railway at Lot 78. This railway remained at Lot 78 until approximately the 1980s. The City of Woonsocket acquired the property from Consolidated Real Estate, LLC on May 12, 2004 in a transaction that also included the abutting Lot 81.

Property name: LOT 27-62 UNDEVELOPED LAND VILLA NOVA STREET REAR
 Property #: 27-62
 Parcel size: 1.13

Property Description: The first documented development at this property was the G. Daignault Planing Mill and Lumber Yard constructed at the property between 1898 and 1903. This facility operated at the property at least through 1911. By 1939, the property was undeveloped, and no buildings were present. The City of Woonsocket acquired the parcel from the estate of Eugene J. Daignault through "Taking of Fee" on November 13, 1963 for flood control purposes. The parcel remained undeveloped since that time.

State/tribal NFA date:	Not reported
Air contaminated:	Not reported
Air cleaned:	Not reported
Asbestos found:	Y
Asbestos cleaned:	Not reported
Controlled substance found:	Not reported
Controlled substance cleaned:	Not reported
Drinking water affected:	Not reported
Drinking water cleaned:	Not reported
Groundwater affected:	Not reported
Groundwater cleaned:	Not reported
Lead contaminant found:	Y
Lead cleaned up:	Not reported
No media affected:	Not reported
Unknown media affected:	Not reported
Other cleaned up:	Not reported
Other metals found:	Y
Other metals cleaned:	Not reported
Other contaminants found:	Not reported
Other contaminants found description:	Not reported
PAHs found:	Not reported
PAHs cleaned up:	Not reported
PCBs found:	Not reported
PCBs cleaned up:	Not reported
Petro products found:	Not reported
Petro products cleaned:	Not reported
Sediments found:	Not reported
Sediments cleaned:	Not reported
Soil affected:	Y
Soil cleaned up:	Not reported
Surface water cleaned:	Not reported
VOCs found:	Not reported
VOCs cleaned:	Not reported
Cleanup other description:	Not reported
Num. of cleanup and re-dev. jobs:	Not reported
Past use greenspace acreage:	Not reported
Past use residential acreage:	Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

	Data Release Frequency: Semi-Annually

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> PROVIDENCE, RI	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	44007C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> FRANKLIN	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Precambrian
System:	Precambrian
Series:	Z Sedimentary rocks
Code:	Z (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Udorthents

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches		Not reported	Not reported	Max: 42.34 Min: 14.11	Max: 6 Min: 3.6
2	11 inches	25 inches		Not reported	Not reported	Max: 42.34 Min: 14.11	Max: 6 Min: 3.6
3	25 inches	59 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 3.6

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Hinckley

Soil Surface Texture:
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 3.6

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Community and Non-Community Wells

Source: Department of Environmental Management

Telephone: 401-277-2234

Includes Community, Non-Transient Non-Community and Transient Non-Community.

EPA-Approved Sole Source Aquifers in Rhode Island

Source: EPA

Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

OTHER STATE DATABASE INFORMATION

RADON

State Database: RI Radon

Source: Department of Health

Telephone: 401-222-2438

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Inquiry # 4524281.3

Contact: Nicole Campagnone

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by C & E Engineering Partners Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

CASE NARRATIVE / METHOD CONFORMANCE SUMMARY

The results presented in this report relate only to the samples received.

This report is incomplete unless all pages indicated in the pagination at the bottom of the page are included, along with a copy of the chain of custody and any subcontracted analyses reports, if applicable, for the sample(s) in this report. Subcontractor results are identified by 'SUB' next to the analysis.

Microbac Laboratories, Inc. received six samples from C & E Engineering Partners on 01/29/2016. The samples were analyzed for the following list of analyses in accordance with RI DOH regulations unless otherwise indicated:

Semivolatiles by 8270D in SW
8270D[3550C]

Volatiles by 8260C in GW by 5030C
8260C

Trace RCRA (8) Heavy Metals in Solids
6010C[3000], 7471B[7471B]

Sample results are reported on a dry weight basis.

Non-Conformances:

Work Order:

The samples submitted for Method 8260C solids analysis were improperly collected. Method 5035A recommends 5g of soil collected in a 40 mL vial with stir bar, to prevent potential analyte loss due to opening of the vial. The samples were submitted in small plastic bags, and it was necessary to open each bag and remove an aliquot for analysis. The analytical results contained in this report do not meet all method data quality objectives and may not be suitable for regulatory compliance.

The samples submitted for Method 8270D solids analysis were improperly collected. The samples were collected in plastic bags. Plastic is not recommended for semivolatiles analysis due to the likelihood of phthalate contamination.

Sample:

None

Analysis:

Metals:

The chromium recovery for the matrix spike analysis, that was performed on Sample 4, was -127%. This is outside of the established quality control limits of 75-125%. In compliance with Method 6010C, the digested sample was post spiked, yielding a recovery of 81%.

The associated laboratory control sample recovery was within the established quality control limits.

The relative percent difference for the sample/sample duplicate analysis performed on Sample 4 was outside of the control limit of 35% for silver (48%), barium (62%), chromium (103%) and mercury (66%).

CASE NARRATIVE / METHOD CONFORMANCE SUMMARY

The results presented in this report relate only to the samples received.

**Non-Conformances:
Analysis:**

Semivolatile Organics:

Several samples in this SDG had internal standard recoveries below the 50% guideline. Each sample was re-analyzed to demonstrate a matrix effect. Below is a list with their corresponding recovery:

Sample 2, Sample 2: IS5 = 47%, IS6 = 18%
Sample 5, Sample 5: IS5 = 40%, IS6 = 15%
Sample 6, Sample 6: IS6 = 48%

The matrix spike analysis performed on Sample 4, resulted in the following:

Spike Recovery: 6 out of 68 outside limits

Sample 6A, Sample 6, Semivolatiles by 8270D in SW: The sample required a dilution which effectively diluted out the surrogate components.

Volatile Organics:

2-Hexanone did not meet the recommended minimum response factor for the low level initial calibration standard by Method 8260C.

Several samples in this SDG had internal standard recoveries below the 50% guideline. Each sample was re-analyzed to demonstrate a matrix effect. Below is a list with their corresponding recovery:

Sample 1, Sample 1: IS3 = 38%
Sample 3, Sample 3: IS3 = 48%
Sample 6, Sample 6: IS2 = 39%, IS3 = 22%

The matrix spike and matrix spike duplicate analysis performed on Sample 4, resulted in the following:

RPD: 3 out of 16 outside limits

Spike Recovery: 10 out of 32 outside limits

Sample 6B, Sample 6, Volatiles by 8260C: Toluene-d8 surrogate spike was elevated outside quality control limits for the sample due to matrix interference.

Terms and Conditions

STATEMENT OF TERMS AND CONDITIONS

Attached to and made a part of the Letter Agreement and Proposal for Services dated November 12, 2015 (Revised December 16, 2015) between **City of Woonsocket Water** (CLIENT) and C&E Engineering Partners, Inc. (ENGINEER), in respect of the Project (PROJECT) described therein.

SECTION 1. SERVICES TO BE PROVIDED

1.1 ENGINEER hereby agrees to provide CLIENT with the services set forth in the Proposal for Services and under the terms and conditions set forth herein.

1.2 If ENGINEER's services include the performance of any services during the construction phase of the PROJECT, it is understood that the purpose of any such services (including any visits to the site) will be to enable ENGINEER to better perform the duties and responsibilities assigned to and undertaken by it as an experienced and qualified design professional, and to provide CLIENT with a greater degree of confidence that the completed work of the Contractor(s) will conform generally to the Contract Documents and that the integrity of the design concept as reflected in the Contract Documents has been implemented and preserved by Contractor(s). Neither the professional activities of ENGINEER, nor the presence of ENGINEER or his or her employees and subconsultants at a construction site, shall relieve the General Contractor and any other entity of their obligations, duties and responsibilities including, but not limited to, construction means, methods, sequence, techniques or procedures necessary for performing, superintending or coordinating all portions of the work of construction in accordance with the contract documents and any health or safety precautions required by any regulatory agencies. ENGINEER and his or her personnel have no authority to exercise any control over any construction contractor or other entity or their employees in connection with their work or any health or safety precautions. CLIENT agrees that the General Contractor is solely responsible for jobsite safety, and warrants that this intent shall be made evident in CLIENT's agreement with the General Contractor. CLIENT also agrees that CLIENT, ENGINEER and ENGINEER's consultants shall be indemnified and shall be made additional insureds under the General Contractor's general liability insurance policy.

1.3 ENGINEER shall review and approve (or take other appropriate action in respect of) shop drawings, samples and other data which Contractor(s) is (are) required to submit, but only for conformance with the design concept of the PROJECT and compliance with the information given in the Contract Documents. Such review and approvals or other actions shall not extend to means, methods, techniques, sequences or procedures of construction or to safety precautions and programs incident thereto. ENGINEER's review or other actions, as described above, shall not constitute approval of an assembly of which an item is a component, nor shall it relieve the Contractor(s) of (a) their obligations regarding review and approval of any such submittals; and (b) their exclusive responsibility for the means, methods, sequences, techniques and procedures of construction, including safety of construction.

SECTION 2. BILLING AND PAYMENT

2.1 CLIENT agrees to pay ENGINEER in accordance with the rates and charges set forth in the attached Proposal for Services. Invoices for services rendered and expenses incurred will be submitted monthly by ENGINEER to CLIENT. All such invoices shall be due and payable upon receipt.

In the event of a disputed or contested billing, only that portion so contested may be withheld from payment, and the undisputed portion will be promptly paid.

2.2 If CLIENT fails to make any payment due ENGINEER for services and expenses within

thirty (30) days after the invoice date of ENGINEER's statement therefore, the amounts due ENGINEER shall include an interest charge at the rate of one and one-half percent (1.5%) per month from said thirtieth day, and in addition, ENGINEER may, after giving seven (7) days written notice to CLIENT, suspend services under this Agreement until he has been paid in full all amounts due him for services and expenses. Unless ENGINEER receives payment in full within seven (7) days of the date of the notice, the suspension shall take effect without further notice. Payments on account will be credited first to interest and then to principal. In the event of a suspension of services, ENGINEER shall have no liability to CLIENT for delay or damage caused CLIENT because of such suspension of services.

2.3 In the event of termination by CLIENT under Section 19, CLIENT shall remain liable for and shall promptly pay ENGINEER the full amount for all services rendered by ENGINEER to the date of termination and all termination costs together with interest on all overdue accounts in accordance with the foregoing rate and attendant attorneys' fees and costs of collection. No failure by ENGINEER to exercise any right hereunder shall operate as a waiver nor preclude ENGINEER from exercising any other right.

2.4 If CLIENT fails to make payment to ENGINEER in accordance with the payment terms herein, this shall constitute a material breach of this Agreement and shall be cause for termination by ENGINEER.

2.5 In the event legal action is necessary to enforce the payment provisions of this Agreement, ENGINEER shall be entitled to collect from CLIENT any judgment or settlement sums due, reasonable attorneys' fees, court costs and expenses incurred by ENGINEER in connection therewith and, in addition, the reasonable value of ENGINEER's time and expenses spent in connection with such collection action, computed at ENGINEER's prevailing fee schedule and expense policies.

2.6 Payment of invoices is in no case subject to unilateral discounting or set-offs by CLIENT, and payment is due regardless of suspension or termination of this Agreement by either party.

SECTION 3. ADDITIONAL SERVICES

3.1 Services required by CLIENT, which are not part of those described in the Proposal for Services, shall be considered Additional Services. Additional Services shall be furnished by ENGINEER, or obtained from others by ENGINEER, if requested in writing by CLIENT. CLIENT shall pay ENGINEER for Additional Services in accordance with rates and charges agreed to in writing prior to authorization by CLIENT.

3.2 Oral directives by CLIENT authorizing Additional Services will be confirmed in writing by ENGINEER. CLIENT shall pay ENGINEER for orally directed Additional Services furnished by ENGINEER in accordance with ENGINEER's current Schedule of Fees unless other rates and charges for compensation are agreed to subsequent to completion of authorized Additional Services. C&E Engineering partners, Inc. reviews its Schedule of Fees annually and reserves the right to adjust its schedule accordingly.

SECTION 4. REIMBURSABLE EXPENSES

4.1 Normal reimbursable expenses are in addition to the fee for services and shall be billed at N/A times the amount expended. Reimbursable expenses include, but are not limited to, expenses associated with the PROJECT such as: travel including transportation, meals and lodging; printing, copying and handling of documents; computer charges including computer-aided design; film and processing; telephone calls and other communications charges; postage and delivery; equipment for tests; and securing approval of authorities having jurisdiction over the PROJECT and not specified as part of the fee.

SECTION 5. CLIENT'S RESPONSIBILITIES

5.1 ENGINEER shall indicate to CLIENT the information needed for rendering of services hereunder. CLIENT shall provide to ENGINEER all criteria and full information as to CLIENT's requirements for the Project and such other information as is available to CLIENT and CLIENT's consultants and contractors, and ENGINEER shall be entitled to rely upon the accuracy and completeness thereof. CLIENT recognizes that it is impossible for ENGINEER to assure the accuracy, completeness and sufficiency of such information, either because it is impossible to verify, or because of errors or omissions, which may have occurred in assembling the information, CLIENT is providing.

5.2 CLIENT shall designate in writing a person to act as CLIENT's representative with respect to the services to be rendered; shall examine and respond promptly to ENGINEER's submissions; and shall give prompt written notice to ENGINEER whenever he observes or otherwise becomes aware of any defect in the work.

5.3 CLIENT shall arrange for access to and make all provisions for ENGINEER to enter upon public and private property as required for ENGINEER to perform his services.

SECTION 6. INSURANCE

6.1 ENGINEER is protected by Workmen's' Compensation Insurance, Commercial General Liability Insurance, Automobile Liability Insurance and Professional Liability Insurance, and we will furnish information and certificates upon request.

SECTION 7. EFFECTIVE DATE

7.1 This Agreement will become effective upon ENGINEER's receipt of authorization to proceed. The Proposal for Service is subject to renegotiation if acceptance is not received within ninety (90) days.

SECTION 8. STANDARD OF CARE

8.1 Services provided by ENGINEER under this Agreement will be performed in a manner consistent with that degree of care and skill ordinarily exercised by members of the same profession currently practicing under similar circumstances.

SECTION 9. OWNERSHIP OF INSTRUMENTS OF SERVICE

9.1 All reports, plans, specifications, field data and notes and other documents, including all documents on electronic media prepared or furnished by ENGINEER under this Agreement are instruments of service in respect of the PROJECT. ENGINEER shall retain the ownership and property interest in those instruments of service whether or not the PROJECT is completed; however, if the PROJECT is completed, CLIENT may retain copies solely for information and record reference purposes in connection with the completed PROJECT. These documents are not intended or represented to be suitable for reuse by CLIENT or others in connection with (a) the completion of the PROJECT if ENGINEER's agreement has been terminated or ENGINEER otherwise is not involved in the PROJECT; (b) extensions of the PROJECT; and/or (c) any other project. Any reuse without written verification or adaption by ENGINEER for the specific purpose intended will be at CLIENT's sole risk and without any liability or legal exposure to ENGINEER and its independent professional associates, consultants and subcontractors. Any such verification or adaption will entitle ENGINEER to further compensation at rates to be agreed upon by CLIENT and ENGINEER.

SECTION 10. OPINIONS OF PROBABLE COST

10.1 Since ENGINEER has no control over the cost of labor, materials, equipment, or services

furnished by others, or over the Contractor(s)' methods of determining prices, or over competitive bidding or market conditions, his opinions of probable project cost and construction cost provided for herein are to be made on the basis of his experience and qualifications and represent his best judgment as an experienced and qualified professional engineer, familiar with the construction industry; but ENGINEER cannot and does not guarantee nor make warranty, expressed or implied, that proposals, bids, or actual project or construction cost will not vary from opinions of probable cost prepared by him. Similarly, since ENGINEER has no control over building operation and/or maintenance costs, ENGINEER cannot and does not guarantee that the actual building or system operating or maintenance costs will not vary from any estimates given by ENGINEER.

SECTION 11. WAIVER OF SUBROGATION

11.1 CLIENT and ENGINEER waive all rights against each other and against the contractors, consultants, agents and employees of the other for damages, but only to the extent covered by any property or other insurance. CLIENT and ENGINEER shall each require similar waivers from their contractors, consultants and agents.

SECTION 12. CERTIFICATIONS

12.1 The proposed language of certificates, affidavits or certifications requested of ENGINEER or ENGINEER's consultants shall be submitted to ENGINEER for review and approval at least fourteen (14) days prior to expected execution. CLIENT shall not request certifications and/or affidavits that would require knowledge or services beyond the scope of this Agreement and/or beyond the professional qualifications and engineering expertise of ENGINEER.

SECTION 13. LIMITATION OF LIABILITY

13.1 To the maximum extent permitted by law, CLIENT agrees to limit ENGINEER's liability to CLIENT for or on account of all claims and/or damages of any nature whatsoever caused by or arising out of ENGINEER's performance of its services, such that the total aggregate liability of ENGINEER for any and all claims and/or damages of any nature whatsoever, arising out of the performance of ENGINEER's services on the PROJECT, shall not exceed \$50,000 or ENGINEER's total fee for services rendered on the PROJECT, whichever is greater.

13.2 Notwithstanding any other provision of the Agreement, neither party shall be liable to the other for any special, indirect, incidental, or consequential damages incurred due to the fault of the other party, regardless of the nature of this fault or whether it was committed by CLIENT or ENGINEER, their employees, agents, subconsultants or subcontractors. Consequential damages include, but are not limited to, loss of use and loss of profit.

SECTION 14. SERVICES MADE NECESSARY BY LACK OF CONTRACTOR PERFORMANCE

14.1 It is CLIENT's responsibility to hire the Contractor, and it is the Contractor's responsibility to install and complete fully operable systems. CLIENT agrees to pay ENGINEER 2.5 times Payroll Costs for all its trouble-shooting work due to Contractor's inability to achieve satisfactory operation. CLIENT shall hold harmless, defend and indemnify ENGINEER, its officers, agents, employees and consultants, from any and all liabilities, claims, damages and suits arising out of the negligence of CLIENT or its agents, or liability due to the negligence of any contractor(s) performing any portion of the work and supplying any materials, or any other parties, except for any liability of ENGINEER, or its consultants, due to the sole negligence of ENGINEER, or its consultants.

SECTION 15. HAZARDOUS WASTE/ASBESTOS/CONTAMINANTS

15.1 In consideration of the substantial risks to ENGINEER involving or relating to the actual or threatened release, escape or discharge of hazardous waste, asbestos and/or other contaminants, it

is agreed that CLIENT to the fullest extent permitted by law, shall release and indemnify and hold harmless ENGINEER and its consultants, agents and employees, from and against all claims, damages, losses and expenses, direct and indirect, including but not limited to attorneys' fees and defense costs, arising out of or resulting from the performance of any services by ENGINEER, or claims against ENGINEER related to, involving or arising out of hazardous waste, asbestos or other contaminants.

SECTION 16. INDEMNIFICATION

16.1 In addition, and notwithstanding any other provisions of this Agreement, CLIENT agrees, to the fullest extent permitted by law, to indemnify and hold harmless ENGINEER, his or her officers, directors, employees, agents and subconsultants from and against all damage, liability or cost, including reasonable attorney's fees and defense costs, arising out or in any way connected with this project or performance by any of the parties above named of the services under this Agreement, excepting only those damages, liabilities or costs attributable to the sole negligence or willful misconduct of ENGINEER.

SECTION 17. SUSPENSION OF SERVICES

17.1 If the Project is suspended by CLIENT, or the services are suspended by ENGINEER in accordance with paragraph 2.2 of this Agreement for more than thirty (30) calendar days in the aggregate, ENGINEER shall be compensated for services performed and charges incurred prior to receipt from CLIENT or issuance by ENGINEER of notice to suspend and, upon resumption, an equitable adjustment in fees to accommodate the resulting demobilization and remobilization costs. Depending on the duration of the stoppage, an additional adjustment may be necessary to cover wage increases and general escalation. In addition, there shall be an equitable adjustment in the project schedule based on the delay caused by the suspension. If the Project is suspended for more than ninety (90) calendar days in the aggregate, ENGINEER may, at his or her option, terminate this Agreement upon giving notice in writing to CLIENT.

SECTION 18. DISPUTE RESOLUTION

18.1 Any disputes arising out of or relating to this Agreement, including disputes under termination, shall first be submitted to nonbinding mediation unless the parties mutually agree otherwise.

18.2 The parties further agree to include a similar mediation provision in all agreements with independent contractors and consultants retained for the project and to require all independent contractors and consultants also to include a similar mediation provision in all agreements with subcontractors, subconsultants, suppliers or fabricators so retained, thereby providing for mediation as the primary method for dispute resolution between the parties to those agreements.

18.3 Any dispute not settled by agreement of the parties shall be decided by litigation in a court of competent jurisdiction.

SECTION 19. TERMINATION

19.1 Either CLIENT or ENGINEER may terminate this Agreement at any time with or without cause upon giving the other party ten (10) calendar days prior written notice. CLIENT shall within thirty (30) calendar days of termination pay ENGINEER for all services rendered and all costs incurred up to the date of termination, in accordance with the compensation provisions of this Agreement.

SECTION 20. TITLES

20.1 The titles in this Agreement are for general reference only and are not part of the Agreement.

SECTION 21. ASSIGNMENT

21.1 Neither party to this Agreement shall transfer, sublet or assign any rights under or interest in this Agreement (including but not limited to monies that are due or monies that may be due) without the prior written consent of the other party.

SECTION 22. GOVERNING LAW

22.1 The laws of the State of Rhode Island will govern the validity of this Agreement, its interpretation and performance. Any litigation arising in any way from this Agreement shall be brought in the courts of the State of Rhode Island.

SECTION 23. INTEGRATION

23.1 This Agreement comprises the final and complete agreement between CLIENT and ENGINEER. It supersedes all prior or contemporaneous communications, representations, or agreements, whether oral or written, relating to the subject matter of this Agreement. Amendments to this Agreement except as otherwise provided herein, shall not be binding unless made in writing and signed by both CLIENT and ENGINEER.

SECTION 24. SEVERABILITY AND SURVIVAL

24.1 Any provision of this Agreement later held to be unenforceable for any reason shall be deemed void, and all remaining provisions shall continue in full force and effect. All obligations arising prior to the termination of this Agreement and all provisions of this Agreement allocating responsibility or liability between CLIENT and ENGINEER shall survive the completion of the services hereunder and the termination of this Agreement.

SECTION 25. SUCCESSORS AND ASSIGNS

25.1 CLIENT and ENGINEER each binds himself and his partners, successors, executors, administrators, assigns, and legal representatives to the other party of this Agreement and to the partners, successors, executors, administrators, assigns, and legal representatives of such other party, in respect to all covenants, agreements, and obligations of this Agreement.

25.2 Neither CLIENT nor ENGINEER shall assign, sublet, or transfer any rights under or interest in (including, but without limitation, moneys that may become due or moneys that are due) this Agreement without the written consent of the other, except as stated in paragraph 25.1 and except to the extent that the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under this Agreement. Nothing contained in this paragraph shall prevent ENGINEER from employing such independent consultants, associates, and subcontractors as he may deem appropriate to assist him in the performance of services hereunder.

25.3 Nothing herein shall be constructed to give any rights or benefits hereunder to anyone other than CLIENT and ENGINEER.

SECTION 26. ENTIRE AGREEMENT

26.1 This Agreement contains the entire understanding of the parties with respect to the subject matter hereof and there are no verbal understandings, statements, or stipulations bearing upon the meaning or effect of this Agreement. This Agreement may only be modified or amended by a written instrument executed by both parties, except as may be otherwise provided herein.

(END)
