1. Summary

This report documents findings from the Phase I Environmental Site Assessment (ESA) that BETA Group, Inc. (BETA) has prepared for the property located at 92 & 176 Sunnyside Avenue in Woonsocket, Rhode Island (the Site, see Figure 1). The Woonsocket Assessor's Office identifies the 92 Sunnyside Avenue parcel as Parcel 03B-097-020 which consists of approximately 3.51 acres of land. The Woonsocket Assessor's Office identifies the 176 Sunnyside Avenue parcel as Parcel 03B-007-021 which consists of approximately 1.48 acres of land. Three dilapidated buildings currently exist at the 92 Sunnyside Avenue parcel. The 176 Sunnyside Avenue parcel is currently undeveloped.

The purpose of this Phase I ESA was to assess current Site conditions and render an opinion as to the presence of Recognized Environmental Conditions (RECs) in connection with the property, within the scope and limitations of the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-13. Recognized Environmental Conditions are defined in the American Society for Testing and Materials (ASTM) Standard E1527-13 as, "...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimus conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." Any exceptions or deletions from the ASTM practice or Scope of Work are described in Section 2.0 of this Report. Refer to Section 10.0 for a list of acronyms and their definitions.

Phase I ESA Summary

Based on the activities conducted for this Phase I ESA, BETA has identified the following RECs at the Site:

- **Historic Use**: The use of the Site by chemical companies, a hide and tallow facility, and oil companies represent a REC at the Site. Furthermore, at least two structures at the Site were destroyed by fires which likely caused releases of oil and/or hazardous materials.
- **Identified Contaminants**: Previous investigations identified manganese, total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), benzo(a)pyrene, and arsenic in soil and ethylbenzene and toluene in groundwater above the applicable RIDEM standards in the 176 Sunnyside Avenue portion of the Site.
- **Aboveground Storage Tank**: The aboveground storage tank in the eastern portion of the 92 Sunnyside Avenue parcel represents a possible REC if it has leaked.

- **Underground Storage Tanks**: The three USTs in the central portion of the 92 Sunnyside Avenue parcel represent a REC if they have leaked.
- **Solid Waste/Debris/Fill**: The observed solid waste and debris at the Site, along with evidence of fill represents a REC.
- **Abutting Railroad Tracks**: Railroad tracks can be sources of contamination associated with the combustion of coal and/or diesel fuel and herbicide treatments along rail rights-of-way.

Although not a REC, the possible presence of hazardous building materials (asbestos, lead-based paint, etc.) associated with the three remaining structures and the AST should be considered when developing a plan to redevelop the Site.

Section 9.0 contains more details on these RECs and discusses recommendations for additional investigation at the Site.

2. Introduction

2.1 General

At the request of the Rhode Island Department of Environmental Management (the Client), BETA conducted an ASTM Phase I Environmental Site Assessment (ESA) of the property at 92 & 176 Sunnyside Avenue in Woonsocket, Rhode Island (the Site, see Figure 1). The Woonsocket Assessor's Office identifies the 92 Sunnyside Avenue parcel as Parcel 03B-097-020 which consists of approximately 3.51 acres of land. The Woonsocket Assessor's Office identifies the 176 Sunnyside Avenue parcel as Parcel 03B-007-021 which consists of approximately 1.48 acres of land. Three dilapidated buildings currently exist at the 92 Sunnyside Avenue parcel. The 176 Sunnyside Avenue parcel is currently undeveloped.

2.2 Purpose and Scope

This report was prepared for the sole and exclusive use of the Client and is subject to and issued in connection with the Agreement and the provisions thereof. The ESA was conducted to identify Recognized Environmental Conditions (RECs) based on a review of available environmental information and observations of the Site and adjacent properties for overt evidence of a release or threat of release of oil or hazardous materials (OHM). The scope of services for this ESA included a federal and state environmental database search, local research, Site reconnaissance, and interviews with people knowledgeable about the Site. This ESA is subject to the terms of the Agreement between the Client and BETA and the Limitations included in Appendix A.

The scope of services for this report did not include the assessment of the following "additional issues" that are outside the scope of the ASTM Phase I ESA: asbestos-containing building materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, and mold.

2.3 Site Visit Information

Site Visit Conducted By:	Joseph R. McLoughlin II, LEP, LSP
Date of Site Visit:	August 30, 2018
Site Representative:	None
Weather:	90° F and sunny

3. Project Description

3.1 Site Description

The Woonsocket Assessor's Office identifies the 92 Sunnyside Avenue parcel as Parcel 03B-097-020 which consists of approximately 3.51 acres of land. The Woonsocket Assessor's Office identifies the 176 Sunnyside Avenue parcel as Parcel 03B-007-021 which consists of approximately 1.48 acres of land. Three dilapidated buildings currently exist at the 92 Sunnyside Avenue parcel. The 176 Sunnyside Avenue parcel is currently undeveloped. The approximate geographic coordinates of the property are N 42° 15' 25" latitude and W 71° 48' 2" longitude. Figure 2 depicts the Site location.

3.2 Current Operations

The Site is not currently occupied. The three buildings on the Site are vacant and in poor condition.

3.3 Building Descriptions

Three dilapidated buildings currently exist at the 92 Sunnyside Avenue parcel. The 176 Sunnyside Avenue parcel is currently undeveloped. Due to safety concerns, BETA did not inspect the interior of any of the Site buildings. The northernmost building at the Site consists of a single-story three-bay garage constructed of brick with a flat roof. The central building consists of a single-story building with several garage bays constructed of wood with a flat roof. The southern-most building is a small building constructed of wood. BETA observed several foundation remnants in the eastern and northern portions of the 92 Sunnyside Avenue parcel.

3.4 Building Heating and Cooling System

The buildings are not currently heated. Assessor's office records indicate at least one of the buildings at 92 Sunnyside Avenue was heated by oil.

3.5 Plans and Specifications

A copy of the City of Woonsocket Assessor's Map is provided as Figure 2.

3.6 Utilities

Although currently not in service, the City of Woonsocket's municipal water and sewer systems are available to the Site. Natural gas and electric utilities are located in Sunnyside Avenue.

3.7 Environmental Land Use Restrictions

BETA did not encounter any evidence of an Environmental Land Use Restriction (ELUR) or other restriction on the deed for the Site.

3.8 Purchase Price

It is not known at this time if the purchase price would be affected by contamination (known or suspect) present at the Site.

3.9 Environmental Justice

According to RIDEM's online Environmental Resource Map, the Site is located within an Environmental Justice area.

3.10 User Provided Information

BETA did not interview the Site owner(s) and was not provided any information from the user (other than information contained in RIDEM's files for the Site). The City of Woonsocket completed the ASTM questionnaire which is included in Appendix B.

4. Site Characteristics

4.1 Surface Water

The Blackstone River is located approximately ¼-mile north of the Site and Cherry Brook is located approximately 500 feet southeast of the Site.

4.2 Site Drainage/Sensitive Receptors

BETA did not observe any manmade drainage systems on the Site. Precipitation will either percolate into the ground or flow overland towards a low area on the 92 Sunnyside Avenue property.

4.3 Topography

The Site is located at an elevation of approximately 196 feet above the 1929 National Geodetic Vertical Datum. The Site is relatively flat along Sunnyside Avenue and to the south, but drops down to the east and north and then back up to the railroad tracks to the east. The vicinity slopes downward to the north and east.

4.4 Soil and Geology

Soil

According to the United States Department of Agriculture Soil Conservation Service (SCS) Soil Map, soil at the Site is part of the Merrimac-Urban land complex. Soil in this complex consists of excavated and filled land.

Geology

Bedrock outcrops were not observed at or in the vicinity of the Site. According to the Bedrock Geologic Map of Rhode Island (1985), bedrock beneath the Site is part of the Esmond-Dedham sub terrane formation which consists of conglomerate, sandstone, and shale.

4.5 Groundwater

According to the RIDEM Environmental Resource Map, groundwater at the Site is classified as GB, which is known or presumed to be degraded and not suitable for drinking water use without treatment. Based on topography and nearby water bodies, BETA infers that groundwater flows to the north towards the Blackstone River. Previous investigations at the 176 Sunnyside Avenue property have determined groundwater flow to be to the north with depths ranging from 8 to 31 feet below grade.

4.6 Wetlands

BETA did not observe any wetland type vegetation at the Site. According to the RIDEM Environmental Resource Map, no wetlands are mapped within the immediate Site vicinity.

4.7 Floodplain Information

According to the Federal Emergency Management Association (FEMA) Flood Insurance Rate Map (FIRM) Number 44007 C0157J dated March 2, 2009, the Site is located in Zone X, which has been determined to be an area outside the 0.2% annual chance floodplain.

5. Adjacent and Surrounding Properties

The property is located at 92 & 176 Sunnyside Avenue, a mixed use area of Woonsocket. Information concerning surrounding properties was compiled from the Site reconnaissance, as summarized below:

Direction	Adjacent Properties	Surrounding Properties
North	Residential properties and Mason Street	Residential properties and the Fairmount Foundry*
South	Asylum Street	Residential properties
East	Railroad tracks	Industrial building occupied by CVS
West	Sunnyside Avenue	Residential properties

The database search listed the Fairmount Foundry property as a leaking underground storage tank site. Refer to Section 8.2 for more information on this property.

Railroad tracks can be sources of contamination associated with the combustion of coal and/or diesel fuel and herbicide treatments along rail rights-of-way.

6. Site History

6.1 Sanborn Fire Insurance Maps

Sanborn maps identify prior Site uses of real property for many cities and towns in the United States. The maps were originally created to assist insurance underwriters in understanding the potential fire risk of structures requiring insurance; however, they are also useful for determining the previous uses of a property. Sanborn maps often contain information relating to uses of individual structures, location of certain fuel storage tanks, chemical storage tanks, or both, and storage of other potentially toxic substances. Sanborn maps begin their coverage in 1867 and continue through the present. BETA requested copies of Sanborn maps for the Site from Environmental Data Resources, Inc. (EDR). EDR provided copies of 1911, 1950, 1955, 1963, 1965, 1967, and 1970 Sanborn maps. Copies of the Sanborn maps are included in Appendix C. The following summarizes our review of these maps:

- **1911:** This map depicts the 92 Sunnyside Avenue parcel as occupied by two buildings in the central portion of this parcel. These buildings are labeled as “P.J. O’Donnell & Son, Hides & Tallow.” It also depicts several outbuildings in the northern portion of the property that appear to be associated with dwellings along Mason Street. This map depicts the 176 Sunnyside Avenue parcel as undeveloped.
- **1950:** This map depicts the 92 Sunnyside Avenue parcel as occupied by four buildings in the central portion of this parcel. These buildings are labeled as “P.J. O’Donnell & Son, Hides & Tallow.” It also depicts several outbuildings in the northern portion of the property that appear to be associated with dwellings on Mason Street. This map depicts a small building labeled as “Off” (Office) at 110 Sunnyside Avenue. This map depicts the 176 Sunnyside Avenue parcel as occupied by approximately seven buildings labeled as “Woonsocket Color & Chemical Co. Inc.”
- **1955:** This map depicts the Site and vicinity as similar to the 1950 map except a new building appears on the 92 Sunnyside Avenue parcel north of the existing buildings. This building is labeled as “A” for an automotive garage. Additionally, fewer outbuildings appear in the northern portion of the Site.
- **1963:** This map depicts the Site and vicinity as similar to the 1955 map.
- **1965:** This map depicts the Site and vicinity as similar to the 1963 map.
- **1967:** This map depicts the Site and vicinity as similar to the 1965 map.
- **1970:** This map depicts the Site and vicinity as similar to the 1967 map.

6.2 Aerial Photographs

BETA requested copies of historical aerial photographs for the Site from EDR. EDR provided copies of 1939, 1941, 1951, 1962, 1967, 1970, 1975, 1981, 1985, 1995, 2005, 2008, 2012, and 2016 aerial photographs. A copy of the EDR aerial photograph report is included in Appendix C. The following summarizes our review of these aerial photographs:

- **1939, 1941, 1951, and 1962:** These photographs depict an increasing number of buildings at both 92 and 176 Sunnyside Avenue; however, due to the scale of the photographs it is not possible to discern any specific Site features.
- **1967 and 1970:** These photographs depicts the Site as similar to the 1970 Sanborn map with approximately four buildings at 92 Sunnyside Avenue and seven buildings at 176 Sunnyside Avenue.
- **1975:** Due to the scale and poor quality of this photograph it is not possible to discern any specific Site features.
- **1981 and 1985:** These photographs depict the Site as similar to the 1970 aerial photograph.
- **1995:** This photograph depicts four buildings at 92 Sunnyside Avenue and depicts the 176 Sunnyside Avenue parcel as undeveloped.
- **2005, 2008, 2012, and 2016:** Vegetation in these photographs obscures Site features.

6.3 Topographic Maps

BETA requested copies of historical United States Geologic Survey (USGS) topographic maps for the Site from EDR. EDR provided 1889, 1893, 1894, 1940, 1942, 1943, 1947, 1948, 1953, 1954, 1970, 1975, 1998, 1999, and 2012 USGS Topographic Maps. A copy of the topographic map report is included in Appendix C. The following summarizes our review of these maps.

- **1889, 1893, and 1894** –Sunnyside Avenue does not appear to exist on these maps.
- **1940, 1942, 194, 1947, 1948, 1953, 1954, 1970, 1975, 1998, and 1999** – These maps depicts two small structures at the Site.
- **2012** – This maps depict the Site as within a developed area of Woonsocket. No Site features are depicted.

6.4 City Directories

Historical City directories and Cross Reference directories are often useful for obtaining historical tenants for a property. City directories provide tenant listings, by address, for every year covered by the directory service. EDR provided copies of 1938, 1942, 1946, 1951, 1958, 1963, 1968, 1973, 1977, 1982, 1987, 1992, 1995, 2000, 2005, 2010, and 2014. A copy of the EDR City Directory Abstract is included in Appendix C. The following summarizes the listings for the Site:

- **1938: 92 Sunnyside Avenue:** O'Donnell P J & Sons hides and tallow and Woonsocket Color and Chemical Co.; **110 Sunnyside Avenue:** Diamond Oil Co Inc. fuel oil; **140 Sunnyside Avenue:** Blackstone Oil Co.; **176 Sunnyside Avenue:** Farrar Lumber Co bldg. materials.
- **1942: 92 and 140 Sunnyside Avenue:** O'Donnell P J & Sons hides and tallow and Woonsocket Color and Chemical Co.; **110 Sunnyside Avenue:** Diamond Oil Co Inc. fuel oil; **176 Sunnyside Avenue:** Storage.

- **1946:** **92 Sunnyside Avenue:** O'Donnell P J & Sons hides and tallow and Woonsocket Color and Chemical Co.; **110 Sunnyside Avenue:** Diamond Oil Co Inc. fuel oil; **176 Sunnyside Avenue:** Woonsocket Color and Chemical Co. and Duryea Products Co Inc paint oil mfrs.
- **1951:** **92 Sunnyside Avenue:** O'Donnell P J & Sons hides and tallow and Woonsocket Color and Chemical Co.; **110 Sunnyside Avenue:** Diamond Oil Co Inc. fuel oil; **176 Sunnyside Avenue:** Woonsocket Color and Chemical Co.
- **1958:** **92 Sunnyside Avenue:** O'Donnell P J & Sons hides and tallow and Nitro-Form Agricultural Chemical Co.; **110 Sunnyside Avenue:** Diamond Oil Co Inc. fuel oil; **176 Sunnyside Avenue:** Woonsocket Color and Chemical Co.
- **1963:** **92 Sunnyside Avenue:** O'Donnell P J & Sons hides and skins; **110 Sunnyside Avenue:** Diamond Oil Co Inc. fuel oil; **176 Sunnyside Avenue:** Woonsocket Color and Chemical Co.
- **1968:** **92 Sunnyside Avenue:** O'Donnell P J & Sons hides and skins; **110 Sunnyside Avenue:** Diamond Oil Co Inc. fuel oil; **176 Sunnyside Avenue:** Woonsocket Color and Chemical Co.
- **1973:** **92 Sunnyside Avenue:** O'Donnell P J & Sons rendering; **110 Sunnyside Avenue:** Diamond Oil Co Inc. fuel oil; **176 Sunnyside Avenue:** Woonsocket Color and Chemical Co.
- **1977:** **92 Sunnyside Avenue:** O'Donnell P J & Sons; **110 Sunnyside Avenue:** Diamond Oil Co Inc.; **176 Sunnyside Avenue:** Duryea Products Co Inc.
- **1982:** **92 Sunnyside Avenue:** O'Donnell P J & Sons; **110 Sunnyside Avenue:** Diamond Oil Co Inc.; **176 Sunnyside Avenue:** Gaspee Chemical Ltd.
- **1987:** **92 Sunnyside Avenue:** O'Donnell P J & Sons; **110 Sunnyside Avenue:** No listing; **176 Sunnyside Avenue:** Gaspee Chemical Ltd.
- **1992:** **92 Sunnyside Avenue:** O'Donnell P J & Sons; **110 Sunnyside Avenue:** No listing; **176 Sunnyside Avenue:** No listing.
- **1995:** **92 Sunnyside Avenue:** Cavedon Joseph Chemical Co.; **110 Sunnyside Avenue:** No listing; **176 Sunnyside Avenue:** No listing.
- **2000:** **92 Sunnyside Avenue:** No listing; **110 Sunnyside Avenue:** No listing; **176 Sunnyside Avenue:** No listing.
- **2005:** **92 Sunnyside Avenue:** No listing; **110 Sunnyside Avenue:** No listing; **176 Sunnyside Avenue:** No listing.
- **2010:** **92 Sunnyside Avenue:** No listing; **110 Sunnyside Avenue:** No listing; **176 Sunnyside Avenue:** No listing.
- **2014:** **92 Sunnyside Avenue:** No listing; **110 Sunnyside Avenue:** No listing; **176 Sunnyside Avenue:** No listing.

6.5 Interviews

BETA did not interview any former Site owners during the Site reconnaissance. A questionnaire was not completed for this report.

6.6 Previous Assessments or Investigations

BETA identified several previous reports for 176 Sunnyside Avenue during the research for this Phase I ESA. Section 8.2 summarizes these reports.

6.7 Ownership History

According to the City of Woonsocket City Clerk's records, "Collector's Deeds" were filed by the City of Woonsocket for both Site parcels on December 14, 2017. According to the Woonsocket Planning Department, the City filed liens on the Site parcels in October 2017 and is eligible to foreclose in October 2018. The following table summarizes the chain of title for 176 Sunnyside Avenue back to 1919.

Owner	Date of Purchase	Book/Page
City of Woonsocket (Collector's Deed)	12/14/17	2328/327
CKG Development Co., LLC	2004	1273/116
Jerome W. Cahill	1987	634/270
Pharma Realty	1981	517/226
BL&M Bottling Co.	1979	482/17
Woonsocket Color and Chemical, Inc.	1940	226/10
Farrar Lumber Company	1928	Unknown

PJ O'Donnell & Sons Inc. formerly owned the 92 Sunnyside Avenue parcel.

6.8 Adjacent Properties

The Site is located at 92 & 176 Sunnyside Avenue in Woonsocket. Adjacent properties consist of a mix of commercial and residential use.

6.9 Historical Summary

The 92 Sunnyside Avenue parcel was occupied by the P.J. O'Donnell & Son hides and tallow and rendering facility from circa 1911 to circa 1992. A 1995 City Directory lists the occupant of this parcel as Cavedon Joseph Chemical Co. Historical records also indicate that the Woonsocket Color & Chemical Company and Nitro-Form Agricultural Chemical Co. were also tenants at this property in the past. A fire in April 1998 destroyed one of the buildings at this property. It appears this parcel has been vacant since circa 1995.

City directories list Diamond Oil Co. Inc., a fuel oil supplier, as occupying 110 Sunnyside Avenue (which appears to be part of the Site) from circa 1938 to 1982. The 1950 Sanborn map depicts a small building labeled as “Off” (office) at 110 Sunnyside Avenue. The 1938 City Directory listed Blackstone Oil Co. as occupying 140 Sunnyside Avenue. Both of these addresses appear to have been part of the Site.

The 176 Sunnyside Avenue parcel was occupied by the Woonsocket Color & Chemical Co. Inc. from circa 1940 to circa 1973. Prior to 1940 the Farrar Lumber Co. occupied this parcel. A 1977 City Directory lists the occupant of this parcel as Duryea Products Co Inc. Gaspee Chemical Ltd. occupied this parcel from circa 1982 to circa 1987. A previous report indicated that the buildings were destroyed in a fire in 1989. It appears this parcel has been vacant since that time.

7. Site Reconnaissance

7.1 Nature of Operations & Current Tenants

At the time of inspection, both Site parcels are vacant. The three structures observed at the Site are in very poor condition and are not currently occupied. Evidence of trespassing (worn trails and solid waste) was noted in many areas of the Site.

7.2 Oil and Hazardous Materials (OHM) Storage and Usage

Other than the tanks discussed below in Section 7.3, BETA did not observe any OHM storage or usage at the Site.

7.3 Petroleum and Chemical Storage Tanks

BETA observed a large (greater than 10,000-gallon) aboveground storage tank (AST) in the low-lying eastern portion of the 92 Sunnyside Avenue property. This tank is in poor condition with graffiti painted on it (see Photographs). A RIDEM report indicates that this tank was wrapped with asbestos (see Section 8.2). It is not known what this AST contained or when it was installed.

BETA identified one small manhole structure east of Building #2 at the 92 Sunnyside Avenue property that may be associated with a UST in that area. BETA did not observe any other fill ports or vent pipe in this area (which the Fire Department records indicate is the location of three USTs). BETA observed a round patched area that may have been the fill port for a UST.

7.4 Environmental Permits

BETA did not encounter any environmental permits during the research for this Phase I ESA.

7.5 Hazardous Waste

BETA did not observe the generation or storage of hazardous waste at the Site.

7.6 Solid Waste and Wastewater

Solid Waste

BETA observed solid waste scattered about the majority of the Site. This waste included tires, wood, yard waste, a bicycle, and various litter.

Sanitary Sewage

Municipal sewer service is available in Sunnyside Avenue.

Liquid Discharges

BETA did not observe liquid discharges at the Site.

7.7 Site Housekeeping

The Site buildings are in very poor condition with solid waste and graffiti observed. Solid waste was observed in many areas of the Site.

7.8 Stained Soil, Stained Pavement or Stressed Vegetation

BETA did not observe any stained soil or pavement at the Site. The vegetation at the Site appeared healthy for the time of the year (August) except in the southern portion of the Site where there was a large area without any vegetation.

7.9 Interior and Exterior Drainage Structures

BETA did not observe any man-made drainage structures at interior or exterior portions of the Site.

7.10 Pools, Ponds, Pits or Lagoons

BETA did not observe any man-made pools, ponds, pits or lagoons at the Site.

7.11 On-Site Water Supply and Observation Wells

BETA observed several monitoring wells in the southern portion of the Site that were likely installed as part of previous investigations at 176 Sunnyside Avenue.

7.12 Fill Material

BETA observed steep incline leading up to the railroad tracks that appears to be manmade. BETA observed foundation remnants and evidence of urban fill (bricks and coal slag) in the northern portion of the Site.

7.13 Air Emissions

BETA did not observe significant air emissions at the Site.

7.14 Indoor Air

BETA did not observe any potential impacts to indoor air. Historic investigations identified VOCs in soil and groundwater in the southern portion of the Site; however, no buildings currently exist in this area.

7.15 Odors

BETA did not notice any odors during the Site reconnaissance.

7.16 Polychlorinated Biphenyls (PCBs)

BETA did not observe any pad- or pole-mounted transformers at the Site.

7.17 Asbestos Containing Materials (ACM)

Since the Site buildings were constructed prior to 1978, it is possible that certain building materials could be classified as ACM. A comprehensive asbestos inspection was beyond the scope of this ESA. Possible ACM was observed around the aboveground storage tank in the eastern portion of the 92 Sunnyside Avenue property.

7.18 Lead Based Paint (LBP)

Since the Site buildings were constructed prior to 1978, it is possible that lead based paint is present. A comprehensive LBP inspection was beyond the scope of this ESA.

7.19 Lead in Drinking Water

Testing for lead in drinking water was beyond the scope of this ESA.

7.20 Radon

Measurement of potential radon contamination was beyond the scope of this ESA. The U.S. EPA publishes a map of the United States on which each of the 3,141 counties in the U.S. is assigned to one of three zones based on radon potential. Each zone designation reflects the average short-term radon measurement that can be expected to be measured in a building without the implementation of radon control methods. According to the EPA map, the Radon Zone for Providence County is 2. Zone 2 is defined as having predicted indoor average radon levels of between 2 and 4 picocuries per liter (pCi/L). EPA recommends action at concentrations of 4 pCi/L or higher in indoor air. Additional information on radon in indoor air can be found on the US EPA website at <http://www.epa.gov/radon/states/rhodeisland.html>.

7.21 Areas Not Inspected

BETA inspected accessible exterior portions of the Site buildings. BETA did not inspect the interiors of the Site buildings due to safety concerns or in heavily vegetated areas. Additionally, the existing foundation area of the former Site building in the eastern portion of the 92 Sunnyside Avenue property was not inspected due to safety concerns.

8.0 Regulatory Databases and Records

The EDR report gives a listing of sites identified on select federal and state standard source environmental databases within the approximate search radii specified by ASTM Standard Practice for Environmental Site Assessments E1527-13. BETA reviewed each environmental database on a record-by-record basis to determine if certain sites identified in the EDR report represent environmental liability to the Site. A copy of EDR regulatory database report is included in Appendix E. The following table lists the number of sites identified by the EDR report.

FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
REGULATORY DATABASE	SEARCH DISTANCE	TARGET SITE	OFF-SITE LISTINGS
Federal National Priority List (NPL) Facilities	1 Mile	No	0
Federal Delisted NPL Facilities	1-Mile	No	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) Facilities	½-Mile	No	0
Federal CERCLIS No Further Remedial Action Planned (NFRAP) Facilities	½-Mile	No	1
Federal Resource Conservation and Recovery Act (RCRA) Corrective Action (CORRACTS) Facilities	1 Mile	No	0
Federal RCRA Treatment, Storage, and Disposal (TSD) Facilities	½-Mile	No	0
Federal RCRA Generator Facilities	Site and Adjoining	No	2
Federal Brownfield Facilities	½-Mile	Yes	2
Federal Institutional Controls/Engineering Controls (IC/EC) Registries	½-Mile	No	0
Federal Emergency Response Notification System (ERNS) Facility	Site Only	No	-
Federal Facility Index System (FINDS) Facility	Site Only	No	-
Federal FIFRA/TSCA Tracking System (FTTS)	Site Only	No	-
State Hazardous Waste Sites (SHWS)/Tribal Equivalent CERCLIS Facilities	1 Mile	Yes	30
State Leaking Underground Storage Tank Facilities	½-Mile	No	11
State and Tribal Solid Waste Landfill (SWL) Facilities	½-Mile	No	0
State and Tribal Registered Underground Storage Tank (UST) Facilities	Site and Adjoining	Yes	18
State and Tribal Registered Aboveground Storage Tank (AST) Facilities	Site and Adjoining	No	0
State and Tribal IC Registries	½-Mile	No	6
State and Tribal Voluntary Cleanup Program (VCP) Facilities	½-Mile	No	0
State and Tribal Brownfield Facilities	½-Mile	No	0
State Spill Facilities	Site Only	No	-

The EDR report also identified 24 non-geocoded sites. These are sites that could not be mapped or “geocoded” due inadequate address information. Refer to the EDR report for a list of these sites. BETA attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, BETA did not identify any sites within the specified radii.

A description of the databases reviewed by BETA and an analysis of sites identified within the prescribed search distances are presented in the following sections.

8.1 United States Environmental Protection Agency (USEPA) Databases

NPL Facilities

This is a list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or “Superfund”). A site must be on the NPL to receive money from the Trust Fund for Remedial Action. The database search did not identify NPL facilities within one mile of the Site.

Delisted NPL Facilities

Facilities that the EPA determined may be deleted from the NPL because no further response is appropriate. The database search did not identify Delisted NPL facilities within ½-mile of the Site.

CERCLIS Facilities

CERCLIS is the USEPA system for tracking potential hazardous waste sites within the Superfund program. A site's presence in CERCLIS does not imply a level of federal activity or progress at a site, nor does it indicate that hazardous conditions necessarily exist at the location. Within one year of being entered into CERCLIS, the USEPA performs a preliminary assessment of a site. Based upon the results of the preliminary assessment, the USEPA may conduct additional investigations which could lead to a site being listed on the NPL. The database search did not identify CERCLIS facilities within ½-mile of the Site.

CERCLIS NFRAP Facilities

CERCLIS sites identified as NFRAP facilities have been removed from the CERCLIS because these sites may be identified as where no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered significant enough to be placed on the NPL. The database search identified one NFRAP facilities within ½-mile of the Site. This facility is located 0.406 miles north-northeast of the Site. Based on its distance and/or inferred cross- to downgradient location this facility does not likely pose a threat of release of OHM to the Site.

RCRA CORRACTS Facilities

RCRA CORRACTS is a list of facilities that are found to have had hazardous waste releases and require RCRA corrective action activity, which can range from site investigations to remediation. The database search did not identify any CORRACTS facilities within 1-mile of the Site.

RCRA TSD Facilities

The RCRA TSD Facilities List contains information pertaining to those facilities that treat, store, or dispose of hazardous waste. While these facilities represent some form of hazardous waste activity, they are most significant if determined to be out of compliance or to have violations. The database search did not identify any TSD facilities within ½-mile of the Site.

RCRA Generator Facilities

BETA reviewed the list of sites which have filed notification with the USEPA in accordance with RCRA requirements. These sites include generators of hazardous waste regulated under RCRA. Under RCRA, hazardous waste generators are classified by the mass of hazardous waste generated in a calendar month into the following categories: Large Quantity Generator, greater than 1,000 kilograms/month (Kg/month); Small Quantity Generator, 100 to 1,000 Kg/month; and Conditionally-Exempt Small Quantity Generator, less than 100 Kg/month. RCRA Generators, while they represent some form of hazardous waste activity, are most significant if they are determined to have Class I Violations or to be non-compliant. The database search identified two RCRA generators within a ¼-mile radius of the Site. Based on their distance and lack of reported releases, these properties do not likely pose a threat of release of OHM to the Site.

IC/EC Registries

The database search did not identify the Site or surrounding properties on the IC/EC registries.

Brownfield Facilities

The database search did not identify Brownfields facilities within ½-mile of the Site.

ERNS Facility

The ERNS is a database of notifications of oil discharges and hazardous substance releases. The primary purpose of ERNS is to standardize and collect notifications made to the Federal government of releases of oil and hazardous substances. These notifications are used by “On-Scene Coordinators” to determine an emergency response and release prevention. When a call is made to the National Response Center or one (1) of the ten USEPA Regions, a report is created containing all of the release information that the caller provided. This report is transferred to an appropriate agency to evaluate the need for a response and the records are electronically transferred to the ERNS database. As such, if a reported release of oil or a hazardous substance is deemed to require a response, it should also be listed in the appropriate federal or state level environmental database such as CERCLIS, state equivalent CERCLIS, or state leaking underground storage tank or spills. The database search did not identify the Site on the ERNS database.

8.2 Rhode Island Department of Environmental Management (RIDEM) Databases

State SHWS Facilities

The SHWS list is an inventory of hazardous waste release sites maintained by RIDEM. The database search identified the Site and 30 SHWS facilities within a 1-mile of the Site. The closest of the off-site SHWS facilities is located approximately 0.131 mile east-northeast of the Site. Based on their distances, cross- or downgradient location and/or regulatory status, the off-site facilities do not likely pose a threat of release of OHM to the Site. Furthermore, determining impact from an off-site release would be difficult given the known and possible releases at the Site.

BETA reviewed RIDEM's file for the SHWS listing for 176 Sunnyside Avenue. The following summarizes the reports and documents contained in RIDEM's file.

June 2005 "Site Investigation Report" for 176 Sunnyside Avenue by Alliance Environmental Group, Inc.

Alliance Environmental Group, Inc. (AEG) prepared the Site Investigation Report (SIR) for CKG Development Co., LLC (CKG, the owner of this parcel at that time). On May 6, 2005, CKG submitted a Notice of Release form to RIDEM due to the presence of beryllium, lead, ethylbenzene, and total xylene in soil and ethylbenzene and toluene in groundwater above RIDEM standards. RIDEM issued a May 31, 2005 Letter of Responsibility to CKG that required an SIR. AEG completed the SIR to address RIDEM's requirement.

AEG summarized investigatory work completed by Levine-Fricke (LFR) at the 176 Sunnyside Avenue parcel. In October 2003 and January 2004, LFR oversaw the advancement of a total of seventeen (17) soil borings and the installation of seven monitoring wells. As stated above, LFR identified beryllium, lead, ethylbenzene, and total xylene in soil and ethylbenzene and toluene in groundwater above RIDEM standards.

In December 2004, AEG oversaw the excavation of ten test pits at the 176 Sunnyside Avenue property. AEG field screened soil samples but did not submit any samples for laboratory analysis. AEG evaluated three remedial alternatives and selected "Source Removal, Groundwater Monitoring, Soil Cap and Implementation of an Environmental Land Use Restriction (ELUR)" as the preferred remedial alternative.

2005 and 2006 Miscellaneous RIDEM Documents

The RIDEM file contained the following miscellaneous documents:

- An August 11, 2005 letter to CKG that documented RIDEM's review and comments regarding AEG's SIR. In this letter, RIDEM requested additional soil and groundwater sampling at the Site boundaries to determine if "the contamination has impacted any abutting properties." RIDEM also requested additional documentation of AEG's initial subsurface investigation work and additional historical use of chemicals at the property.

- A November 15, 2005 “Letter of Non-Compliance” issued to CKG for the lack of response to RIDEM comments related to AEG’s SIR for the 176 Sunnyside Avenue Property. RIDEM requested a Site Investigation Work Plan (SIWP) be submitted by December 16, 2005.
- An October 5, 2006 “Notice of Intent to Enforce” issued to CKG for not implementing a March 17, 2006 SIWP that AEG submitted to RIDEM.

February 2011 “Phase I Environmental Site Assessment” for 176 Sunnyside Avenue by Fuss & O’Neill

Fuss & O’Neill (F&O) completed a Phase I Environmental Site Assessment for the 176 Sunnyside Avenue property for RIDEM in 2011. F&O identified the Site as the “Former Woonsocket Color and Chemical Company.”

F&O’s report included a review of several previous reports for 176 Sunnyside Avenue that BETA did not encounter during the course of this Phase I ESA. These reports include a September 2003 Phase I ESA by Levine Fricke Recon (LFR), a November 2003 Subsurface Investigation by LFR, and a March 2004 Subsurface Investigation by LFR.

F&O identified the following RECs at the 176 Sunnyside Avenue property:

- Historical Industrial Use: F&O identified the historic use of the Site by Woonsocket Color and Chemical from the 1940s through the 1970s and a subsequent fire in 1989. F&O also stated that a buried rail car may have existed at the Site in the past.
- Historical Releases at Adjacent Properties: F&O identified the abutting property at 92 Sunnyside Avenue as having the potential to impact 176 Sunnyside Avenue (please note that for BETA’s report the Site consists of both of these properties). F&O identified the historic use of 92 Sunnyside Avenue by a hide and tallow company, Woonsocket Color and Chemical Company, and Nitro-form Agricultural Chemical Co. with historic spills of acetone, “hydro acid,” and various chemicals from a fire. Additionally, F&O identified USTs at 92 Sunnyside Avenue. F&O also identified possible oil companies that may have occupied the 92 Sunnyside Avenue property or property in between the two properties (which would encompass “the Site” as defined for this assessment).
- Documented Presence of Contaminants in Soil and Groundwater: Previous investigations identified beryllium, lead, ethylbenzene, and total xylene in soil and ethylbenzene and toluene in groundwater above RIDEM standards.
- Debris: F&O identified widespread solid waste around the 176 Sunnyside Avenue property.
- On-Site and Abutting Railroad: F&O identified an abandoned rail spur on the 176 Sunnyside Avenue parcel and the abutting active railroad tracks as a potential for contamination at the Site.
- F&O did not make any recommendations in their report.

June 2014 “Site Investigation Report/Targeted Brownfields Assessment” 176 Sunnyside Avenue by Fuss & O’Neill

F&O was retained by RIDEM to conduct an SIR and Targeted Brownfields Assessment (TBA) at the 176 Sunnyside Avenue property. According to F&O, AEG’s preferred remedial alternative was never implemented.

F&O conducted a ground penetrating radar (GPR) survey in June 2011. The GPR survey identified an anomaly in the north central portion of the survey area near Sunnyside Avenue that F&O identified as a potential UST.

In June 2011, F&O oversaw the advancement of fourteen soil borings and the installation of monitoring wells in nine of these borings. Based on the results of the 2011 investigation, in April 2013, F&O oversaw the advancement of twelve soil borings and the installation of monitoring wells in ten of these borings in the railroad track right-of-way east of the Site. Between the two rounds of investigation, F&O submitted 49 soil samples and 26 groundwater samples for laboratory analysis of a variety of contaminants. Laboratory analysis identified manganese, total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), benzo(a)pyrene, and arsenic in soil and ethylbenzene and toluene in groundwater at concentrations above the applicable RIDEM standards.

F&O identified a point source area of petroleum and VOCs in southeastern portion of 176 Sunnyside Avenue, a non-point source area of fill with arsenic, polynuclear aromatic hydrocarbons (PAHs), and TPH in the northeastern portion of the 176 Sunnyside Avenue property, and contaminants not related to the Site within the railroad track right-of-way. F&O evaluated remedial alternatives and identified a combination of soil capping and aerobic remediation of groundwater as the preferred remedial alternative.

SWL Facilities

The database search did not identify SWL facilities within ½-mile of the Site.

Registered UST Facilities

The database search identified the Site and 18 UST other facilities within ¼-mile of the Site. The closest of these (the Fairmount Foundry) is located across Mason Street from the northernmost portion of the Site. This property is listed as a leaking UST site, see below for more info.

BETA reviewed the file for the UST listing for the Site at the RIDEM office. The following summarizes the reports and documents contained in RIDEM’s file.

May 7, 1986 “Application for Underground Storage Facilities”

This application filed by P.J. O’Donnell & Sons indicates that the following three USTs exist at the Site:

- Two 500-gallon gasoline USTs installed in “1950 est.”
- One 8,000-gallon gasoline UST installed in 1974.

These records indicate that these three USTs were “bare” steel with “bare” steel piping.

November 19, 1998 “Emergency Response Report”

Mr. John Leo of RIDEM completed this Emergency Response Report subsequent to a fire at 92 Sunnyside Avenue on April 26, 1998. In this report, Mr. Leo documented the following in this report:

- “The fire resulted in the destruction of the building and all the chemicals stored in the building were then made waste. Some of the chemicals were declared hazardous waste.”
- “On the 19t of November 1998 Ball and (sic) inspected the facility of the Caveon Chemical Company at 92 Sunnyside Ave. As of that date all associated hazardous waste has been removed from that location. This waste was generated by a fire on April 26 1998. The hazardous waste had been stored in locked storage containers until arrangements could be made for the transportation and proper disposal of the material. No further cleanup is necessary by the Caveon Company.”
- “However there is still the matter of the solid waste generated by the fire. This includes scrap metal and wood and ash. This material is the responsibility of the owner of the property C.&H O’D, Inc. at 92 Sunnyside Ave.”
- “Furthermore, there are several large underground storage tanks used for the storage of motor fuels and heating oil. As of Dec 22, 1998 these tanks will be in violation of federal statutes.”
- “Further there is a large above ground storage tank that has not been properly closed and also it has asbestos around it that needs to be disposed of.”

RIDEM records did not include any records of closure or removal of these USTs.

February 21, 2018 “Letter of Non-Compliance”

RIDEM issued a Letter of Non-Compliance because this facility did not “meet the minimum requirements for UST Class A/Class B operator training and certification.”

Registered AST Facilities

The database search did not identify any registered AST facilities within ¼-mile of the Site.

IC Facilities

The database search identified six Industrial Control (IC) facilities within ½-mile of the Site. Based on the distances to the Site and regulatory status, these facilities do not likely pose a threat of release of OHM to the Site.

LUST Facilities

The database search identified eleven LUST facilities within ½-mile of the Site. The closest of these (the Fairmount Foundry) is located across Mason Street from the northernmost portion of the Site. BETA infers this property to be downgradient of the Site. Based on their distances, cross- or downgradient location and/or regulatory status, these facilities do not likely pose a threat of release of OHM to the Site.

Brownfields Facilities

The database search identified the Site and two other Brownfields sites within ½-mile of the Site. These listings indicate that assessment and/or remediation at these properties was funded by EPA and/or RIDEM.

8.3 Local Regulatory Agency Interviews

Fire Department - Fire Prevention Office

Woonsocket Fire Department Assistant Fire Marshall Lieutenant John Polacek provided BETA with notes from a December 19, 1988 “Pre-Fire Planning Inspection” for 92 Sunnyside Avenue and September 29, 1988 and March 22, 1989 “Pre-Fire Planning Inspections” for 176 Sunnyside Avenue. The following summarizes the pertinent information from these records:

92 Sunnyside Avenue

- Fire Department records indicate three buildings existed at the 92 Sunnyside Avenue property in 1988; Building #1, an office/garage building (currently existing); Building #2, a garage building (currently existing); and Building #3, a warehouse building (currently just a foundation).
- Three underground storage tanks exist east of Building #1, one 8,000-gallon and two 500-gallon gasoline tanks.
- The pumps for the gasoline tanks were located inside Building #1 along with 55-gallon drums of motor oil.
- Building #2 was used for automobile storage.
- Building #3 was occupied by Cavco Chemical Company and had hundreds of 55-gallon drums of flammable hazardous materials and hazardous waste. These materials included chromic chloride molybolic oxide, zinc berate, diammonium phosphate, waste oil, mixed solvents, diethylene glycol, propylene glycol, dibromopropanol, sodium chlorite, methanol, isopropyl, aluminum chlorohydrate, and acetone.
- Lt. Polacek said this building burned and during the fire drums of chemicals exploded and flew through the air.

176 Sunnyside Avenue

- The two reports for this property indicate that two buildings existed at the Site, a southern building occupied by Clover Chemical Co. and a northern building occupied by Providence Barrel Co. Neither of these building currently exist at the Site.
- The report for Clover Chemical does not document specific storage of chemicals, but lists nitric acid, peroxide, and sulfuric acid as hazards in this building.
- The report for Providence Barrel does not document specific storage of chemicals but depicts numerous areas of the storage of 55-gallon drums in this building.

Planning Office

The Woonsocket Planning office did not have any environmental records for the Site. The Planning office provided information on Site ownership.

Assessor's Office

A review of the Assessor's field card did not identify any environmental liens with respect to the Site.

City Clerk's Office

BETA visited the Woonsocket City Clerk's office to inquire about permits or licenses for the Site. The Woonsocket City Clerk's office did not have environmental records for the Site.

9. Evaluation

BETA performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 for the property at 92 & 176 Sunnyside Avenue in Woonsocket, Rhode Island. Any exceptions to, or deletions from, this practice are described in Section 2.2 of this report and Appendix A.

9.1 Findings

The following summarizes the findings of this Phase I ESA:

Site History

The 92 Sunnyside Avenue parcel was occupied by the P.J. O'Donnell & Son hides and tallow and rendering facility from circa 1911 to circa 1992. A 1995 City Directory lists the occupant of this parcel as Cavedon Joseph Chemical Co. Historical records also indicate that the Woonsocket Color & Chemical Company and Nitro-Form Agricultural Chemical Co. were also tenants at this property in the past. A fire in April 1998 destroyed one of the buildings at this property. It appears this parcel has been vacant since circa 1995.

City directories list Diamond Oil Co. Inc., a fuel oil supplier, as occupying 110 Sunnyside Avenue (which appears to be part of the Site) from circa 1938 to 1982. The 1950 Sanborn map depicts a small building labeled as "Off" (office) at 110 Sunnyside Avenue. The 1938 City Directory listed Blackstone Oil Co. as occupying 140 Sunnyside Avenue. Both of these addresses appear to have been part of the Site.

The 176 Sunnyside Avenue parcel was occupied by the Woonsocket Color & Chemical Co. Inc. from circa 1940 to circa 1973. Prior to 1940 the Farrar Lumber Co. occupied this parcel. A 1977 City Directory lists the occupant of this parcel as Duryea Products Co Inc. Gaspee Chemical Ltd. occupied this parcel from circa 1982 to circa 1987. A previous report indicated that the buildings were destroyed in a fire in 1989. It appears this parcel has been vacant since that time.

Site Reconnaissance

Three dilapidated buildings currently exist at the 92 Sunnyside Avenue parcel. The 176 Sunnyside Avenue parcel is currently undeveloped. Due to safety concerns, BETA did not inspect the interior of any of the Site buildings. The northernmost building at the Site consists of a single-story three-bay garage constructed of brick with a flat roof. The central building consists of a single-story building with several garage bays constructed of wood with a flat roof. The southern-most building is a small building constructed of wood. BETA observed several foundation remnants in the eastern and northern portions of the 92 Sunnyside Avenue parcel.

BETA observed a large (greater than 10,000-gallon) aboveground storage tank in the low-lying eastern portion of the 92 Sunnyside Avenue property. This tank is in poor condition with graffiti painted on it (see Photographs included in Appendix E). A RIDEM report indicates that this tank was wrapped with asbestos (see Section 8.2).

BETA identified one small manhole structure east of Building #2 at the 92 Sunnyside Avenue property that may be associated with a UST in that area. BETA did not observe any other fill ports or vent pipe in this area (which the Fire Department records indicate is the location of three USTs). BETA observed a round patched area that may have been the fill port for a UST.

BETA observed solid waste scattered about the majority of the Site. This waste included tires, wood, yard waste, a bicycle, and various litter.

BETA observed steep incline leading up to the railroad tracks that appears to be manmade. BETA observed foundation remnants and evidence of urban fill (bricks and coal slag) in the northern portion of the Site.

BETA did not observe any stained soil or pavement at the Site. The vegetation at the Site appeared healthy for the time of the year (March) except in the southern portion of the Site where there was a large area without any vegetation. This area may be associated with previously identified contamination at this portion of the Site.

Interviews

BETA did not interview the Site owner as part of this assessment.

Adjacent and Surrounding Properties

The Site is located at 92 & 176 Sunnyside Avenue in Woonsocket. Adjacent properties consist of a mix of industrial and residential use. Railroad tracks abut the Site to the east.

Previous Site Investigations

BETA reviewed several previous reports for the 176 Sunnyside Avenue parcel. These reports identified soil and groundwater contamination above RIDEM standards and identified the 92 Sunnyside Avenue parcel as a possible source of contaminants at 176 Sunnyside Avenue.

Database Search

The database search identified the 176 Sunnyside Avenue parcel as an active remediation site with RIDEM. Previous investigations identified manganese, total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), benzo(a)pyrene, and arsenic in soil and ethylbenzene and toluene in groundwater above the applicable RIDEM standards in the 176 Sunnyside Avenue portion of the Site. Two SIRs have been prepared for the Site that recommended remedial actions at this part of the Site; however, it does not appear that any actions have been taken.

The database search indicated that USTs existed at the Site. RIDEM records indicate two 500-gallon USTs and one 8,000-gallon UST exist at the 92 Sunnyside Avenue parcel. It is not clear the exact location or orientation of these USTs; however, they appear to be east of the office/garage building at this property.

The database search did not identify any properties in the Site vicinity that pose a threat of release to the Site.

Municipal Information

The Woonsocket Fire Department provided information on the USTs at 92 Sunnyside Avenue, historic use of chemicals and the presence of numerous 55-gallon drums of chemical at both properties, and fires at two building that likely resulted in the release of contaminants to the Site.

9.2 Data Gaps

The Site owner was not interviewed for this assessment. This data gap did not significantly hinder BETA's ability to identify RECs at the Site.

Vegetation at the Site was thick in numerous areas of the Site and hindered our inspection. Additionally, the Site buildings and former foundation east of the buildings were not safe to enter. This limitation to our inspections has hindered our ability to identify RECs at the Site.

9.3 Conclusions

BETA performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 for the property at 92 & 176 Sunnyside Avenue in Woonsocket, Rhode Island. Any exceptions to, or deletions from, this practice are described in Section 2.2 of this report and Appendix A. This assessment has identified the following recognized environmental conditions in connection to the property:

- **Historic Use**: The use of the Site by chemical companies, a hide and tallow facility, and oil companies represent a REC at the Site. Furthermore, at least two structures at the Site were destroyed by fires which likely caused releases of oil and/or hazardous materials.
- **Identified Contaminants**: Previous investigations identified manganese, total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), benzo(a)pyrene, and arsenic in soil and ethylbenzene and toluene in groundwater at concentrations above the applicable RIDEM standards in the 176 Sunnyside Avenue portion of the Site.
- **Aboveground Storage Tank**: The aboveground storage tank in the eastern portion of the 92 Sunnyside Avenue parcel represents a possible REC if it has leaked.
- **Underground Storage Tanks**: The three USTs in the central portion of the 92 Sunnyside Avenue parcel represent a RCE if they have leaked.
- **Solid Waste/Debris/Fill**: The observed solid waste and debris at the Site, along with evidence of fill represents a REC.
- **Abutting Railroad Tracks**: Railroad tracks can be sources of contamination associated with the combustion of coal and/or diesel fuel and herbicide treatments along rail rights-of-way.

Although not a REC, the possible presence of hazardous building materials (asbestos, lead-based paint, etc.) associated with the three remaining structures and the AST should be considered when developing a plan to redevelop the Site.

9.4 Recommendations

Based on the identified RECs, BETA recommends conducting a limited subsurface investigation at the Site. This investigation should include:

- BETA recommends re-inspecting the Site during fall conditions (in November or December) to determine if the current vegetation obscured any relevant Site features.
- A ground-penetrating radar survey to determine if the three USTs still exist at the Site and their location/orientation.
- Advancement of soil borings and installation of groundwater monitoring wells in the 92 Sunnyside Avenue portion of the Site. The borings and wells should be advanced at areas of concern based on the RECs.
- Soil and groundwater samples should be submitted for laboratory analysis of volatile organic compounds (VOCs), semi-volatile organic compounds, total petroleum hydrocarbons (TPH), polychlorinated biphenyls, and metals.

Hazardous building materials (asbestos, lead-based paint, etc.) surveys should be considered prior to any renovation or demolition activities.

9.5 Environmental Professional Certification

The following provides the certifications required by the ASTM 1527-13 standard.

“I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in §312.10 of 40 CFR 312.”

“I have the specific qualifications based on educations, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.”

Appendix F contains a resume of my qualifications.

Joseph R. McLoughlin II, LEP, LSP

10. List of Acronyms

ACM	Asbestos Containing Materials
AST	Aboveground Storage Tank
ASTM	American Society of Testing and Materials
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System
CESQG	Conditionally Exempt Small Quantity Generator
CORRACTS	Corrective Action Tracking System
MassDEP	Rhode Island Department of Environmental Protection
DPW	Department of Public Works
EDR	Environmental First Search Report
ETPH	Extractable Total Petroleum Hydrocarbons
ERNS	Emergency Response Notification System
ESA	Phase I Environmental Site Assessment
FINDS	Facility Index System
GEN	Generators
HWS	Hazardous Waste Sites
IRA	Immediate Response Action
Kg	Kilogram
LBP	Lead Based Paint
Lbs	Pounds
LPG	Liquid Petroleum Gas
LTBI	Locations To Be Investigated
LUST	Leaking Underground Storage Tank
MSL	Mean Sea Level
NLR	No Longer Regulated
NPDES	National Pollutant Discharge Elimination System
NPL	National Priorities List
OHM	Oil and/or Hazardous Material
PBS	Petroleum Bulk Storage
PCB	Polychlorinated Biphenyls
pCi/L	PicoCuries per liter
Ppb	Parts per billion
RAATS	RCRA Administrative Action Tracking System
RCRA	Resource Conservation and Recovery Act

Limitations

The Site: 92 & 176 Sunnyside Avenue, Woonsocket, Rhode Island (Assessor's Parcels 03B-007-021 and 03B-097-202)

- This report has been prepared for the sole and exclusive use of the Client and is subject to and issued in connection with the Agreement and the provisions thereof. Any use or reliance upon information provided in this report, without the specific written authorization of Client and BETA, shall be at the User's sole risk.
- In conducting this assessment and investigation, BETA has obtained and relied upon information from multiple sources to form certain conclusions regarding potential environmental issues at and in the vicinity of the subject property. Except as otherwise noted, no attempt has been made to verify the accuracy or completeness of such information.
- The objectives of the assessment and investigation described in this report were to assess the physical characteristics of the subject property with respect to overt evidence of past or present use, storage, and/or disposal of oil or hazardous materials, as defined in applicable state and federal environmental laws and regulations, and to gather information regarding current and past operations and environmental conditions at and in the vicinity of the subject property.
- The scope of this report does not include an assessment of the suitability of Site soil for development/construction. Please note that certain soils, particularly in urban areas, may include low levels of contaminants such as lead, metals, or ash constituents. The presence of such contaminants in soil, while not representing a "release," may result in the need for special handling at increased costs to allow for off Site soil reuse during Site development.
- No attempt has been made to assess the compliance status of any past or present Owner or Operator of the Site with any federal, state, or local laws or regulations.
- The findings, observations, and conclusions presented in this report are limited by the scope of services outlined in our Agreement, which reflects schedule and budgetary constraints imposed by Client for the current phase of environmental assessment. Furthermore, the assessment has been performed in accordance with generally accepted engineering practices and standards set forth in ASTM E 1527-13. No other warranty, expressed or implied, is made.
- The assessment presented in this report is based solely upon: readily-available data, visible portions of the Site, and information gathered to date. Should further environmental or other relevant information be developed at a later date, Client should bring the information to the attention of BETA as soon as possible. Based upon an evaluation, BETA may modify the report and its conclusions.
- It should be noted that the Executive Summary does not contain all the information that is found in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information. This report documents the recognized environmental conditions as defined in ASTM and where appropriate other suspect environmental conditions noted on the Site and associated risks to the environment. Although the survey may not disclose all potential liabilities, a reasonable attempt has been made to do so within the scope of work.
- BETA cannot and does not warrant or guarantee that the information provided by these sources is accurate or complete. The methodologies of this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide the client with information regarding overt evidence of past use storage, and/or release or threat of release of OHM the Site.
- The environmental database search was conducted under the Notice of Disclaimer/Waiver of Liability included in the EDR report.

Checklist for Phase I Site Assessments Conducted using EPA Brownfields Assessment Grant Funds

Contact Information

Grantee Name: Rhode Island Department of Environmental Management

Grant Number: BF-96197401-0 / BF-00A00122

ACRES Property ID: 237792

Program Manager Name: Rachel T. Simpson

(Point of Contact)

Contact Phone Number: (401) 222-2797 Ext. 7105

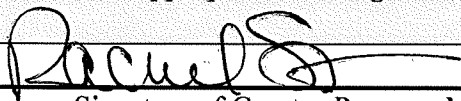

Name / Address of Property Assessed: Sunnyside Avenue / 92 & 176 Sunnyside Ave.

Checklist

Please indicate that each of the following All Appropriate Inquiries documentation requirements were met for the Phase I assessment conducted at the above listed property:

- An *opinion* as to whether the inquiry has identified conditions indicative of releases or threatened releases of hazardous substances, and as applicable, pollutants and contaminants, petroleum or petroleum products, or controlled substances, on, at, in, or to the subject property.
- An identification of "*significant*" *data gaps* (as defined in §312.10 of AAI final rule and §12.7 of ASTM E1527-05 and E1527-13), if any, in the information collected for the inquiry, as well as comments regarding the significance of these data gaps. Significant data gaps including missing and unattainable information that affects the ability of the environmental professional to identify conditions indicative of releases or threatened releases of hazardous substances, and as applicable, pollutants and contaminants, petroleum or petroleum products, or controlled substances, on, at, in, or to the subject property.
- Qualifications and signature* of the environmental professional(s). The environmental professional must place the following statements in the document and sign the document:
 - "[I, We] declare that, to the best of [my, our] professional knowledge and belief, [I, we] meet the definition of Environmental Professional as defined in §312.10 of this part."
 - "[I, We] have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. [I, We] have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Note: Please use either "I" or "We."
- In compliance with §312.31(b) of the AAI final rule and §12.6.1 of ASTM E1527-05 and E1527-13, the environmental professional must include in the final report an *opinion regarding additional appropriate investigation*, if the environmental professional has such an opinion.

Joseph R. McLaughlin II, LSP, LEP
Beta Group, Inc.

Rachel Simpson, Environmental Scientist
DEM RI

Dear Joseph & Rachel:

Attached is a Phase I Environmental Site Assessment Questionnaire which I was asked to fill out on behalf of the City of Woonsocket. As you can see, I have little specific information or knowledge as to the condition of the site. My predecessor David Buoley requested on behalf of the City in 2017 that a Phase I Brown Fields Site Assessment be performed on these two properties. Although the City does not have outright ownership of the parcel at this time we anticipate being able to foreclose on equity redemption later next month. I'm sorry the information that I listed is sparse, however I was not able to find any files here at City Hall concerning the property.

Thank you for your involvement and participation in this most worthwhile project.

Sincerely,

JDM/sja

**All Appropriate Inquiry
Phase I Environmental Site Assessment Questionnaire**

Site Address: 92 and 176 Sunnyside Avenue, Woonsocket, Rhode Island

Questionnaire Completed by: Joel D. Mathews - Planning Director, City of Woonsocket

Representing: _____

Date: September 24, 2018

Pursuant to 40 CFR 312.25, are you aware of the existence of environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state, or local law?

No

Pursuant to 40 CFR 312.26, are you aware of the existence of any Activity and Use Limitations or other institutional controls on the subject property deed?

No

Pursuant to 40 CFR 312.28, do you have any specialized knowledge of the subject property, the conditions of adjoining properties, or any other experience relevant to the inquiry for the purposes of identifying conditions indicative of releases or threatened releases at the subject property?

No

Pursuant to 40 CFR 312.29, does the purchase price of the subject property reasonably reflect the fair market value of the property, if the property were not contaminated?

No purchase price

If the purchase price is lower than the fair market value, is the lower price due to the known or believed presence of contamination at the subject property?

City purchased the tax title to the property in October 2017, and will have the legal ability to get title through the foreclosure of equity redemption next month.

Pursuant to 40 CFR 312.30, do you have any knowledge of commonly known or reasonably ascertainable information about the property that may assist in identifying conditions indicative of releases or threatened releases at the subject property?

No

Do you have any other information (reports, correspondence, plans, etc.) or knowledge of the possibility of contamination at the subject property or at any properties in the vicinity of the subject property?

No

	QUESTION	OWNER	Occupants
		Circle Answer	
1.	Is the <i>property</i> or any <i>adjoining property</i> used for an industrial use?	Yes/ No /Unk	Yes/No/Unk
2.	To the best of your knowledge, has the <i>property</i> or any <i>adjoining property</i> been used for an industrial use in the past?	Yes /No/Unk	Yes/No/Unk
3.	Is the <i>property</i> or any <i>adjoining property</i> used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Yes/No/ Unk	Yes/No/Unk
4.	To the best of your knowledge has the <i>property</i> or any <i>adjoining property</i> been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Yes/No/ Unk	Yes/No/Unk
5.	Are there currently, or to the best of your knowledge have there been previously, any damaged or discarded automobile or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the <i>property</i> or at the facility?	Yes/No/ Unk	Yes/No/Unk
6.	Are there currently, or to the best of your knowledge have there been previously, any industrial <i>drums</i> (typically 55 gal [208 L]) or sacks of chemicals located on the property or at the facility?	Yes /No/Unk	Yes/No/Unk
7.	Has <i>fill dirt</i> been brought onto the property that originated from a contaminated site or that is of an unknown origin?	Yes/No/ Unk	Yes/No/Unk
8.	Are there currently, or to the best of your knowledge have there been previously, any <i>pits, ponds, or lagoons</i> located on the <i>property</i> in connection with waste treatment or waste disposal?	Yes/No/ Unk	Yes/No/Unk
9.	Is there currently, or to the best of your knowledge have there been previously, any stained soil on the <i>property</i> ?	Yes /No/Unk	Yes/No/Unk
10.	Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (above or underground) located on the <i>property</i> ?	Yes/No/ Unk	Yes/No/Unk

	QUESTION	OWNER	Occupants
		Circle Answer	
11.	Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> adjacent to any structure located on the <i>property</i> ?	Yes/No/Unk	Yes/No/Unk
12.	Are there currently, or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?	Yes/No/Unk	Yes/No/Unk
13.	If the <i>property</i> is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated contaminated by any government environmental/health agency?	Yes/No/Unk	Yes/No/Unk
14.	Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of <i>environmental liens</i> or governmental notification relating to the past or recurrent violations of environmental laws with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes/No/Unk	Yes/No/Unk
15.	Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the past or current existence of <i>hazardous substances</i> or petroleum <i>products</i> or environmental violations with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes/No/Unk	Yes/No/Unk
16.	Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of any environmental site assessment of the <i>property</i> or facility that indicated the presence of <i>hazardous substances</i> or petroleum <i>products</i> on, or contamination of, the <i>property</i> or recommended further assessment of the <i>property</i> ?	Yes/No/Unk	Yes/No/Unk
17.	Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any <i>hazardous substance</i> or petroleum <i>products</i> involving the <i>property</i> by any owner or occupant of the <i>property</i> ?	Yes/No/Unk	Yes/No/Unk
18.	Does the <i>property</i> discharge wastewater on or adjacent to the <i>property</i> other than storm water into a sanitary sewer system?	Yes/No/Unk	Yes/No/Unk

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Beta Engineering Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 05/18/2018 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ALICE MILLS FIRE (FO)	58 FAIRMOUNT STREET	NNE 1/4 - 1/2 (0.406 mi.)	I44	111

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
COUSINS AUTO BODY	45 FOUNDRY ST	NE 0 - 1/8 (0.107 mi.)	C11	50

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

RI SHWS: This list includes sites that have been investigated under the Federal CERCLIS program (SFA sites) as well as sites that have notified under the state program or have been investigated for hazardous substances (HWM sites).

A review of the RI SHWS list, as provided by EDR, and dated 03/08/2018 has revealed that there are 31 RI SHWS sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

RI LUST: The LUST Case List is a summary of UST Facilities in RI with leaking USTs, which includes information on the date of release discovery and the status of the LUST Case (active, soil removal only, or inactive).

A review of the RI LUST list, as provided by EDR, and dated 04/05/2018 has revealed that there are 11 RI LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

RI UST: The UST Master List is a summary of registered UST Facilities in RI, which includes information on abandoned, in use, permanently closed and temporarily closed USTs.

A review of the RI UST list, as provided by EDR, and dated 04/05/2018 has revealed that there are 19 RI UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State and tribal Brownfields sites

RI BROWNFIELDS: Brownfields are real properties where the expansion, redevelopment or reuse may be complicated by the actual or reuse may be complicated by the actual or potential presence of a hazardous substance, pollutant, or contaminant.

A review of the RI BROWNFIELDS list, as provided by EDR, and dated 03/08/2018 has revealed that there is 1 RI BROWNFIELDS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

Property Description:	Property was initially developed in 1928 and occupied by the Farrar Lumber Company. Woonsocket Color & Chemical Co. occupied the site from approximately 1940 until 1989 when the site building was destroyed by fire. Activities conducted at the site included manufacturing of fertilizer additives which were marketed to the agricultural industry and oil paint manufacturing. The most recent site owner, CKG Development, abandoned the site and has not paid local taxes for at least the past 17 years. The City of Woonsocket currently holds a tax lien on the site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: P075
. Waste name: NICOTINE, & SALTS

Violation Status: No violations found

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

FINDS:

Registry ID: 110004906111

Environmental Interest/Information System

Rhode Island - Permits, Licenses and Other Vital Environmental Records (RI-PLOVER) is the Rhode Island Department of Environmental Management's regulatory programs' information management system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Rhode Island - Permits, Licenses and Other Vital Environmental Records (RI-PLOVER) is the Rhode Island Department of Environmental Management's regulatory programs' information management system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D011
. Waste name: SILVER

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

Rhode Island - Permits, Licenses and Other Vital Environmental Records (RI-PLOVER) is the Rhode Island Department of Environmental Management's regulatory programs' information management system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Rhode Island - Permits, Licenses and Other Vital Environmental Records (RI-PLOVER) is the Rhode Island Department of Environmental Management's regulatory programs' information management system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate

that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004906068

Environmental Interest/Information System

Rhode Island - Permits, Licenses and Other Vital Environmental Records (RI-PLOVER) is the Rhode Island Department of Environmental Management's regulatory programs' information management system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/13/2018	Source: EPA
Date Data Arrived at EDR: 05/30/2018	Telephone: N/A
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 07/06/2018
Number of Days to Update: 23	Next Scheduled EDR Contact: 10/15/2018
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/13/2018	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 07/06/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 10/15/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Number of Days to Update: 23	Next Scheduled EDR Contact: 10/29/2018
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (888) 372-7341

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (888) 372-7341

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (888) 372-7341

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (888) 372-7341

Number of Days to Update: 73	Next Scheduled EDR Contact: 09/10/2018
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2018	Source: Environmental Protection Agency

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016	Source: EPA
Date Data Arrived at EDR: 10/26/2016	Telephone: 202-564-2496

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 01/03/2018
Date Data Arrived at EDR: 02/14/2018
Date Made Active in Reports: 03/22/2018
Number of Days to Update: 36

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

UTM Y (Meters):	4652328.5
Elevation:	196 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5642169 GEORGIAVILLE, RI
Version Date:	2012
North Map:	5645758 BLACKSTONE, MA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
44007C0157G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
44007C0068G	FEMA FIRM Flood data
44007C0069G	FEMA FIRM Flood data
44007C0156G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GEORGIAVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: Walpole

Soil Surface Texture:
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 7.3 Min: 4.5
2	7 inches	18 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 7.3 Min: 4.5
3	18 inches	64 inches		Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 7.3 Min: 4.5

Soil Map ID: 4

Soil Component Name: Udorthents

Soil Surface Texture:
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Community and Non-Community Wells

Telephone: 401-277-2234

Includes Community, Non-Transient Non-Community and Transient Non-Community.

EPA-Approved Sole Source Aquifers in Rhode Island

Source: EPA

Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

Appendix F

Environmental Professional Qualifications

Joseph R. McLoughlin II, LSP, LEP

Associate

Professional Overview

Mr. McLoughlin has 26 years of experience in the environmental consulting field providing a wide-range of environmental services to clients across New England. Mr. McLoughlin serves as an Associate at BETA directing a diverse staff of scientists, engineers, and risk assessors conducting environmental assessments, site remediation, Brownfields assessments, soil management, regulatory compliance and indoor air quality assessments. Details of Mr. McLoughlin's experience in the above fields of expertise are listed below:

- Due Diligence – Conducted and/or managed over 1,000 ASTM Phase I Environmental Site Assessments and Transaction Screen Assessments at properties across the United States for financial lending institutions, private parties, government agencies, and non-profit organizations. Responsible for the development of templates and systems for efficient completion of assessments. Also, managed numerous large portfolio-type assessments ranging from 20 to 100 properties.
- Site Investigation – Designed and implemented comprehensive subsurface investigations at sites across the U.S. ranging from residential fuel spills to large contaminated commercial and industrial properties. Mr. McLoughlin has performed subsurface investigations in MA, CT, RI, NH, NY, CA, CO, and UT.
- Utility Projects – Served as License Site Professional for numerous Utility-related Abatement Measures (URAMs) on water, sewer, and drainage projects in several Massachusetts municipalities. Developed contract specifications and oversaw the management and disposal of various categories of contaminated soil and asbestos waste.
- Site Remediation – Prepared over 50 Permanent Solution Reports at sites ranging from small fuel oil releases to urban fill areas to releases of chlorinated solvents. Managed remediation of a chlorinated solvent release at a site in Marlborough, Massachusetts. Oversaw the installation of a Soil Vapor Extraction System and the implementation of Monitored Natural Attenuation in a GW-1 groundwater area. Also, managed the remediation of an approximately 4,000-gallon release of No. 2 fuel oil from a leaking underground storage tank.
- Brownfield Redevelopment – Conducted Phase I and Phase II Environmental Site Assessments for several municipalities under EPA Brownfield Assessment petroleum and hazardous materials grants. Assisted in all phases of the Brownfield process including identification of sites, conducting assessments, updating ACRES and interfacing with MassDEP, CTDEEP, and EPA.
- Soil Management – Conducted design assessments of in-situ soil conditions for the development of plans and specifications. Developed specification sections for the management and disposal of contaminated and polluted soil. Provided LSP and LEP services to support the management of soil on large scale construction projects (sewer, water, and streetscape).
- Underground Storage Tanks/New Construction – Submitted applications for and oversaw removal of over 35 Underground Storage Tanks. Responsibilities included all permitting aspects, contractor hiring and oversight, sampling, remediation, and reporting. Licensed Third Party Inspector in Massachusetts.
- Regulatory Compliance and SPCC Plans – Assisted numerous municipal and private clients in complying with various EPA requirements including hazardous material storage, petroleum storage, Stage I vapor recovery, storm water management, and SPCC Plans. Conducted several SPCC employee training seminars in accordance with EPA requirements.

Primary Discipline
Environmental Services

Years of Experience

- BETA: Since 2004
- Total: Since 1992

Education

- BS, Civil Engineering, Worcester Polytechnic Institute (1991)
- MS, Water Resources, Stanford University (1992)

Training and Certifications

- OSHA 40 – Hazardous Waste Operations (1993)
- OSHA 8 – Hazardous Waste Operations (2013)
- OSHA 8 – Asbestos-Cement Pipe Worker Safety

Registrations

- Licensed Site Professional, MA
- Licensed Environmental Professional, CT

Specific project experience is highlighted below:

Framingham, MA

- Licensed Site Professional overseeing Utility-related Abatement Measures (URAMs) for the Concord Street, Downtown Utilities, Grant/Pond, Union Avenue, Speen Street, and Prospect Street projects
- Conducted preliminary environmental assessments on numerous utility projects
- Assisted the Town in the development of their in-house Waste Management Policy and asbestos policy
- Provided Licensed Site Professional Services for a spill of hydraulic fluid from a Town-owned trash truck
- Oversaw the management and disposal of asbestos-containing soil and pipe

Taunton, MA

- Licensed Site Professional for several brownfields properties owned by the City of Taunton
- Responded to an Administrative Consent Order for violations of an Activity and Use Limitation
- Prepared Phase I Initial Site Investigations (ISIs) and Tier Classifications for several City-owned properties
- Underground storage tank inventory and compliance assistance
- Oversees numerous Utility-related Abatement Measures (URAMs) as part of city-wide sewer improvement projects

Hartford, CT

- Conducted numerous Phase I Environmental Site Assessments and Limited Subsurface Investigations on City-owned properties and properties targeted for acquisition.
- Rendered Licensed Environmental Professional (LEP) opinions on the applicability of the CTDEEP Transfer Act.
- Oversaw numerous Hazardous Building Material Investigations on buildings slated for demolition and redevelopment.
- Providing soil management services for the City's Bushnell Park North project.

Clean Water Project – The Metropolitan District, Hartford, CT

- Oversaw the design and implementation of a Sampling and Analysis Plan for several miles of a sewer separation project.
- Managed the advancement of soil borings, installation of monitoring wells, and collection and laboratory analysis of soil and groundwater samples.
- Prepared an Environmental Data Report summarizing findings, conclusions and recommendations and prepared specifications for the handling and management of contaminated and polluted soil and groundwater.

City of Fall River, MA

- Oversaw the implementation of Brownfields investigations at petroleum and hazardous materials properties under an U.S. EPA Brownfields Assessment grant.
- Oversaw an extensive Brownfields investigation of PCB-impacted soil at the City Pier property.
- Developed and implemented a Risk-Based investigation and cleanup plan under EPA's TSCA program.
- Worked directly with MassDEP, Mass Development, and the Seaport council to utilize various Brownfields grants to assess and develop a cleanup plan for the City Pier site.

Former Jostens – Attleboro, MA

- Conducted a Phase I Environmental Site Assessment and Limited Subsurface Investigation for a real-estate transfer.
- Identified chlorinated solvent contamination in soil, groundwater, soil gas, and indoor air.
- Overseeing a Phase II Comprehensive Environmental Site Assessment for submittal to MassDEP.
- Filed a Permanent Solution with Conditions and removed a Activity and Use Limitation from the Site to allow for subdividing of the property.

Cobb Brook Culvert – Taunton, MA

- Oversaw the investigation of soil and groundwater along an 800-foot corridor for the installation of a flood-control culvert for Cobb Brook. The corridor crossed numerous Massachusetts hazardous waste disposal sites.
- Served as the Licensed Site Professional for the implementation of a Utility-Related Abatement Measure (URAM) to manage contaminated soil and groundwater during the installation of the culvert.
- Oversaw the implementation of in-situ lead stabilization to minimize the leaching of lead from an area of ash to facilitate a more-cost effective disposal option for the ash.
- Managed the characterization, submittals, and documentation of contaminated soil and ash to the Taunton Landfill.

Bristol Landfill – Bristol, RI

- Project Manager for quarterly post-closure groundwater and landfill gas monitoring and ongoing investigation and pilot study remediation efforts in five-acre portion of 60-acre municipal landfill.
- Installed and conducted periodic sampling of 12 overburden and 7 bedrock wells to delineate the extent of a groundwater contaminant plume in a portion of the landfill.

International Magnet School – South Windsor, CT

- Project Manager for Phase I, II, and III Environmental Site Assessment at an approximately 14 acre former tobacco farm.
- Prepared and submitted filings to the Connecticut Department of Energy and Environmental Protection under the Voluntary Cleanup Program.
- Oversaw the excavation and on- and off-site management of pesticide, lead, and petroleum impacted soil.

Department of Mental Health Hospitals – Taunton, Worcester, and Westborough, MA

- Prepared comprehensive Spill Prevention Control and Countermeasure (SPCC) Plans in accordance with applicable U.S. Environmental Protection Agency (EPA) requirements
- Provided on-site SPCC training classes for personnel involved with the handling of petroleum at each hospital

Chariho Regional Middle School – Wood River Junction, RI

- Project Manager for groundwater pump and treat and free product removal system.
- Oversaw quarterly groundwater monitoring and operations and maintenance of remedial system and bi-weekly Rhode Island Pollution Discharge Elimination System (RIDES) monitoring with quarterly reporting to RIDEM.
- Designed and installed modified groundwater treatment system including groundwater depression pumps, Spill Buster product recovery units, and treatment shed modifications.

Dry Cleaner – Marlborough, MA

- Project Manager for overburden and bedrock investigation for chlorinated solvents and installation and operation of soil vapor extraction system.
- Installed 15 overburden and 10 bedrock wells and stream monitoring points to assess a chlorinated solvent plume emanating from a dry cleaner tenant of a shopping plaza.
- Designed and installed a soil vapor extraction system to remediate source area and abate indoor air Imminent Hazard condition.
- Prepared Phase I, Phase II, and Phase III reports under the Massachusetts Contingency Plan program.

Handy & Harman Electronic Materials, Inc. – North Attleboro, MA

- Project Manager for RCRA post-closure investigation of a chlorinated solvent plume emanating from a former manufacturing building and waste sludge lagoon.
- Installed 20 overburden wells, 8 shallow bedrock, and one multi-level deep bedrock well to assess a chlorinated solvent plume.
- Conducted indoor air monitoring at several downgradient properties and installed a sub-slab depressurization system to eliminate chlorinated solvent vapors in the basement of an adjacent building.
- Conducted extensive building material testing to facilitate the closure of the facility and the demolition of the building.
